1 Questionnaire Survey, Response Rate

On request by order of the Tauchsport-Industrieverband (tiv) in 2009 two actions have been started in parallel with identical questionnaires:

- Written form of questionnaire in store diving shops,
- Online questionnaire on the home page of <http://www.tauchsportindustrieverband.de>

Included in the questionnaire are the following 12 categories of queries:

1. Residence
2. Year of birth
3. Gender
4. Family status, number of children
5. Year of first diving instruction
6. Status of education today
7. Type of equipment owned
8. Number of dives in total 2008, planned for 2009
9. Year of last dive
10. Other hobbies
11. Value of current diving equipment
12. Average of annual investments for diving trips, courses and further training, diving equipment.

Response rate and recording until 12.10.2009:

- | | |
|---------------------------|-----|
| • Written questionnaires: | 243 |
| • Online questionnaires: | 629 |
| In total | 872 |

The following survey results are mainly tables and graphs with short comments and remarks.

2 Expansion of Collected Statistics to Real Figures

To test for relevance, for the purpose of extrapolation of the results towards actual data sets, the following reference data were available:

- Particulars of age and gender of first-time education at multiple training centers in 2007 and 2008.
- Additional estimates to the market shares of analyzed data.
- Summarized sales data of German diving companies for 2007 and 2008.

A comparison of the structures in age and gender of the participants on initial training in 2007 and 2008 between the collected data and the data from training centers showed:

- A slight increase in male attendees
- A decrease of older divers (> 50) as well as of younger divers (< 20) attending the survey.

For the forecast this imbalance has been adjusted by corresponding correction factors for each questionnaire.

The calculation of the collected statistic factors (percentage of the real amount and the appropriate number of cases) was performed according up to the following information:

1. According to the input from training associations a group of experts concluded that worldwide per annum
approx. 39.000 German divers receive initial training.
2. An expert estimate of total sales in diving equipment demand for Germany shows a volume of
approx. 85.000.000 €/year.
3. Decision is made for the following report to distinguish between
"Scuba Divers" (with own complete equipment)
"Leisure Divers" (without own complete equipment).

In this survey participants were classified as **"scuba diver"** if they stated to own complete diving equipment (warm water or cold water).

The participants were classified as **"leisure diver"** if they stated to own no or just partial personal diving equipment. Due to the fact that these persons attended the survey it was assumed that they do visit diving shops and that they are active divers.

Not recorded in this survey are “**Infrequent divers**” with initial training who presumably do not own noteworthy personal equipment, do not buy at specialized diving shops but possibly use diving attractions on vacation.

Taken into account, that more than 1.2 Million Germans have passed an initial diving instruction, it can be estimated, that “Infrequent divers” represent a group of about 300,000 persons in addition to the sum of approx. 420,000 active divers (see below).

4. According to the data of previous 10 years there is an remarkably stable proportion of entrants of first instructions and persons leaving (drop out of active diving).

The annual transfer rate

“Proportion of new entrants to present” = “Proportion of persons leaving to present”

(see below):

Scuba divers with own equipment: approx. 8,5 %

Leisure divers without own equipment approx. 10%

5. Out of the statements of interviewees the following data are derived:

Average of one-off expenses
for the own diving equipment: 2.500 €

Average of annual expenses
of divers with own equipment 250 €/Year

6. From an iterative adjustment it follows that per annum

approx. 16,000 future scuba divers with own equipment

approx. 23,000 future leisure divers without own equipment

will be instructed.

7. Based on the data the following total of German divers were calculated:

approx. 190,000 scuba divers with own equipment

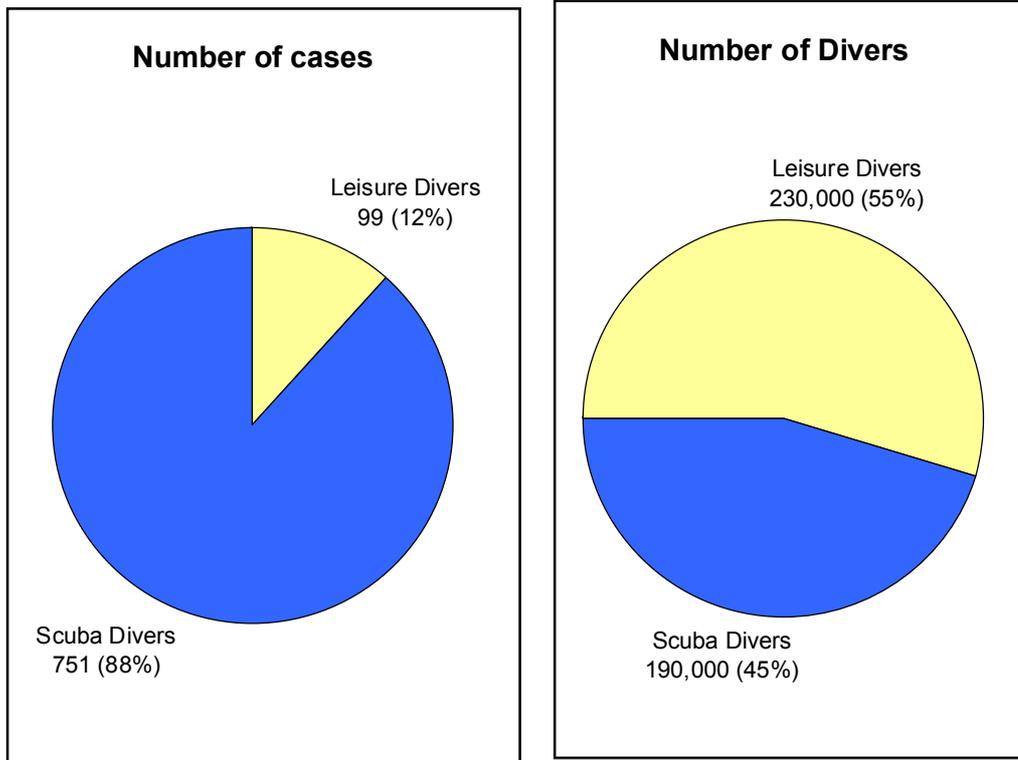

approx. 230,000 leisure divers without own equipment

In total:

approx. 420,000 active divers.

The result of analyzing the questionnaire per categories “scuba divers” and “leisure divers” shows the quantity factors for both categories as follows:

Equipment yes / no	Cases	Number of divers	Quantity factor
Leisure divers	99	230,000	2,333
Scuba divers	751	190,000	253

Remarks:

- Predominantly more “scuba divers” participated in the poll.
- Due to the small sample size of leisure divers only rough estimates could be made for this group.

3 Distribution at Age and Gender

Number of divers projected

Age Group	Scuba divers		Total
	m	w	
15 to 19	3,806	2,328	6,134
20 to 24	7,136	4,365	11,501
25 to 29	11,727	7,421	19,148
30 to 34	14,153	8,163	22,316
35 to 39	20,488	6,076	26,564
40 to 44	26,076	8,355	34,431
45 to 49	21,242	8,017	29,259
50 to 54	17,270	4,482	21,751
55 to 59	9,896	1,862	11,758
60 to 64	4,163		4,163
65 to 69	2,973		2,973
Total	138,930	51,070	190,000

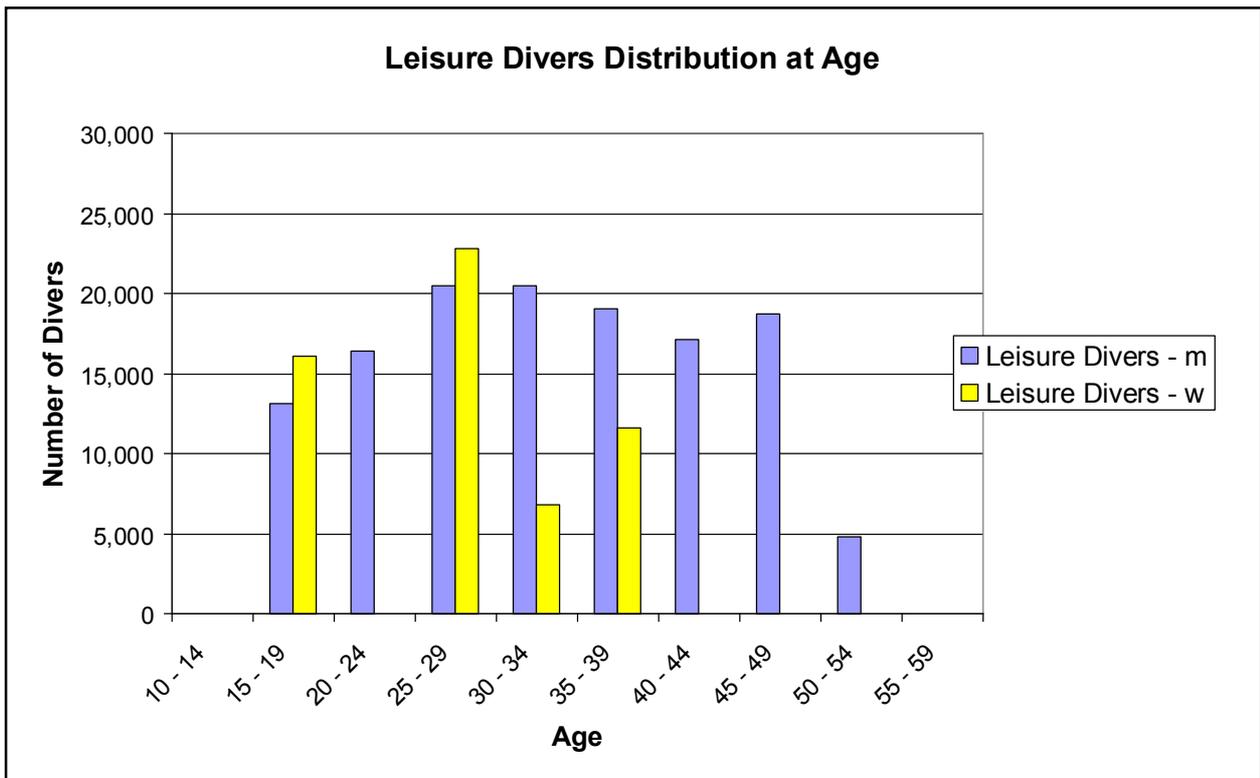

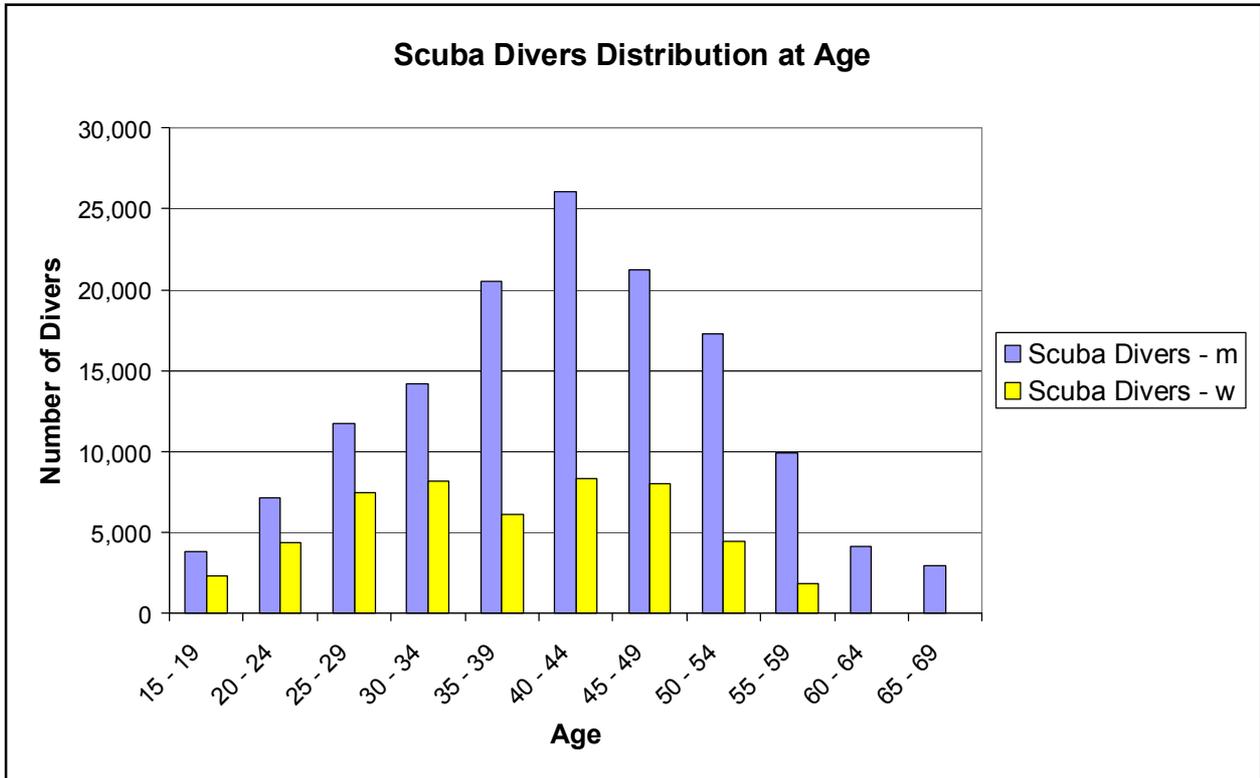

Age Group	Leisure Divers		Total
	m	w	
10 to 14	28,513		28,513
15 to 19	13,160	16,100	29,260
20 to 24	16,450	4,025	20,475
25 to 29	20,508	22,808	43,316
30 to 34	20,508	6,842	27,350
35 to 39	19,082	11,672	30,754
40 to 44	17,174	2,334	19,508
45 to 49	18,753		18,753
50 to 54	4,825	2,952	7,777
55 to 59		4,293	4,293
Total	158,972	71,028	230,000

Distribution by gender:

- Scuba divers: Men: 73%
Women: 27%
- Considering the small number of cases:
Leisure divers: Men: 69%
Women: 31%

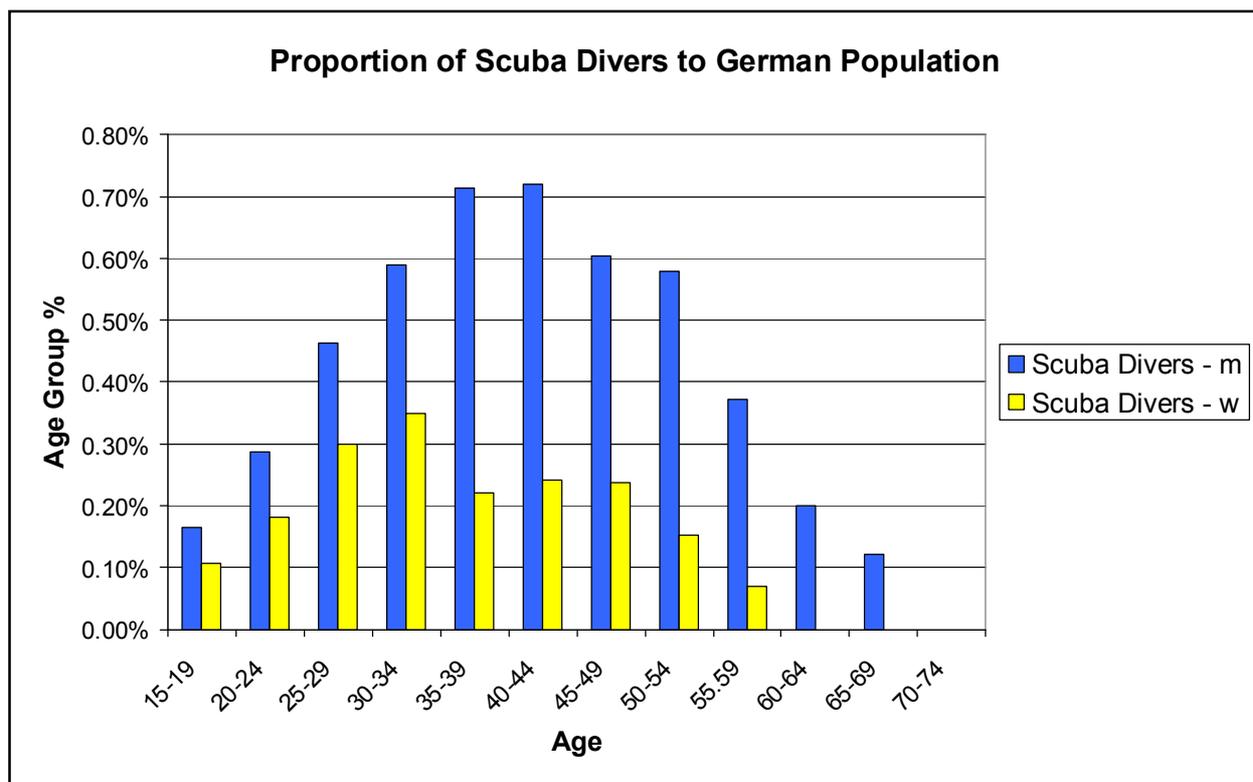

Largest age group:

- Scuba divers: Men: 35 - 50 years, average age: 40 years
Women: 25 - 50 years, average age: 35 years
- Considering the small sample size:
Leisure divers: Men: 25 - 50 years, average age: 31 years

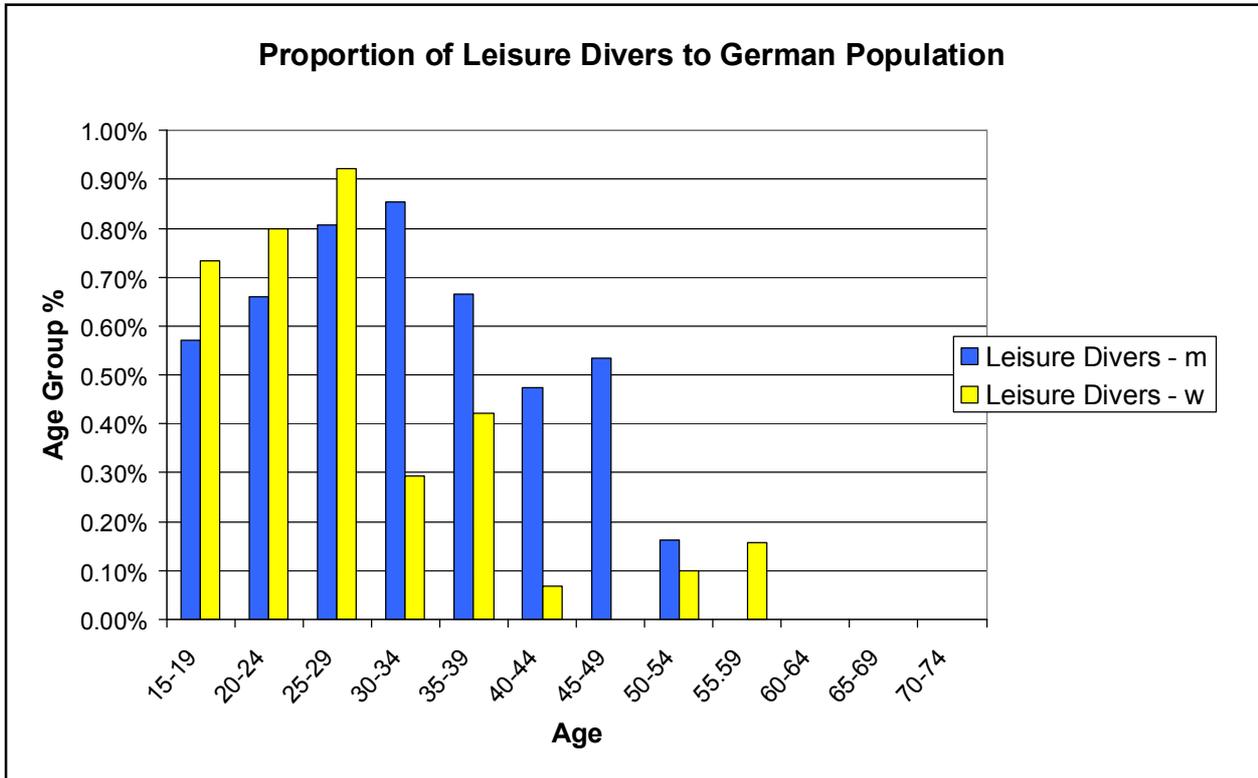

4 Proportion of Divers to Population

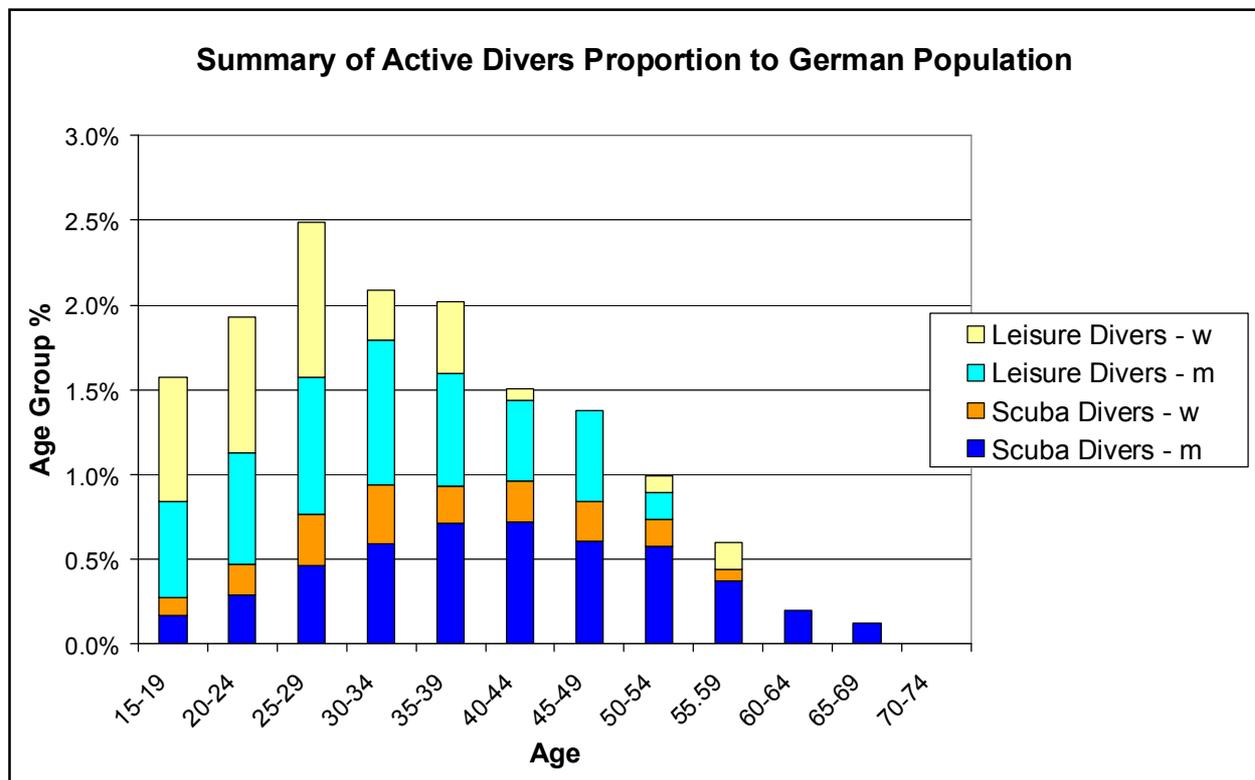

Age Group	Share of the Population %			
	Scuba divers m	Scuba divers w	Leisure divers m	Leisure divers w
15to19	0.17%	0.11%	0.57%	0.73%
20to24	0.29%	0.18%	0.66%	0.17%
25to29	0.46%	0.30%	0.81%	0.92%
30to34	0.59%	0.35%	0.85%	0.29%
35to39	0.71%	0.22%	0.66%	0.42%
40to44	0.72%	0.24%	0.47%	0.07%
45to49	0.60%	0.24%	0.53%	0.00%
50to54	0.58%	0.15%	0.16%	0.10%
55.59	0.37%	0.07%	0.00%	0.16%
60to64	0.20%	0.00%	0.00%	0.00%
65to69	0.12%	0.00%	0.00%	0.00%
70to74	0.00%	0.00%	0.00%	0.00%

- Scuba diving occurs at most for men of the age group 35-45 in approximately 0.7%,
- for women of the age group 30-34 in approximately 0.35%.

- Considering the small sample sizes:
 Largest age groups of population:
 Men: 25-35 years with 0.8 - 0.9%
 Women: 20-30 years with 0.8 - 0.9%

Summary:

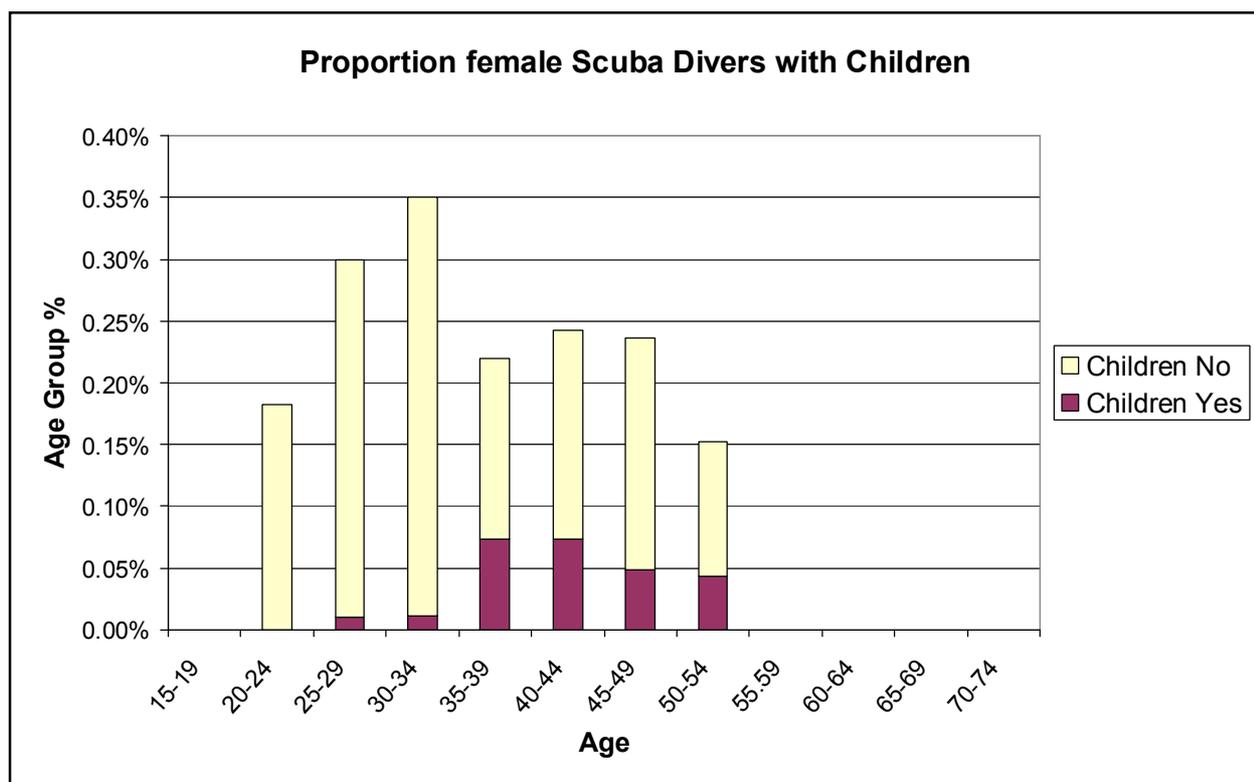

- The proportion of divers to population is with 2.5% strongest among the age group 25-29 but continuously shows a steady decrease with growing age of divers (age group 40-44: 1.5%, age group 50-54: 1%).
- There is a high proportion of women (approx. 50%) among younger divers < 30.

4.1 Women with Children

The statistics of female scuba divers show a significant decrease starting from the age group of 35.

Question: Does this relate to the family structure?

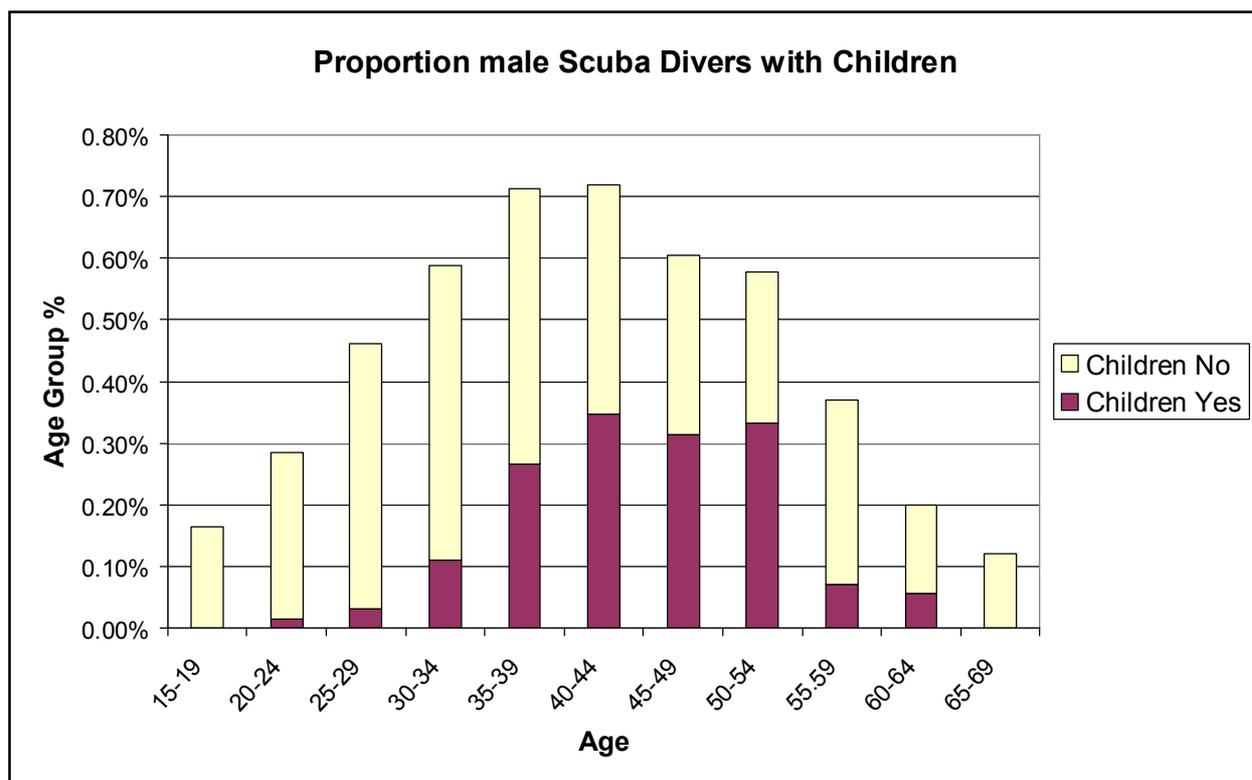

Age Group	Proportion of female Scuba Divers to Population	
	Children yes	Children no
15to19		
20to24	0.00%	0.18%
25to29	0.01%	0.29%
30to34	0.01%	0.34%
35to39	0.07%	0.15%
40to44	0.07%	0.17%
45to49	0.05%	0.19%
50to54	0.04%	0.11%

- The proportion of female scuba divers shows a drop of about one-third after they give birth to children.

4.2 Men with Children

Age-group	Proportion of male Scuba Divers to Population	
	Children yes	Children no
15to19	0.00%	0.17%
20to24	0.01%	0.27%
25to29	0.03%	0.43%
30to34	0.11%	0.48%
35to39	0.27%	0.45%
40to44	0.35%	0.37%
45to49	0.31%	0.29%
50to54	0.33%	0.25%
55.59	0.07%	0.30%
60to64	0.06%	0.14%
65to69	0.00%	0.12%

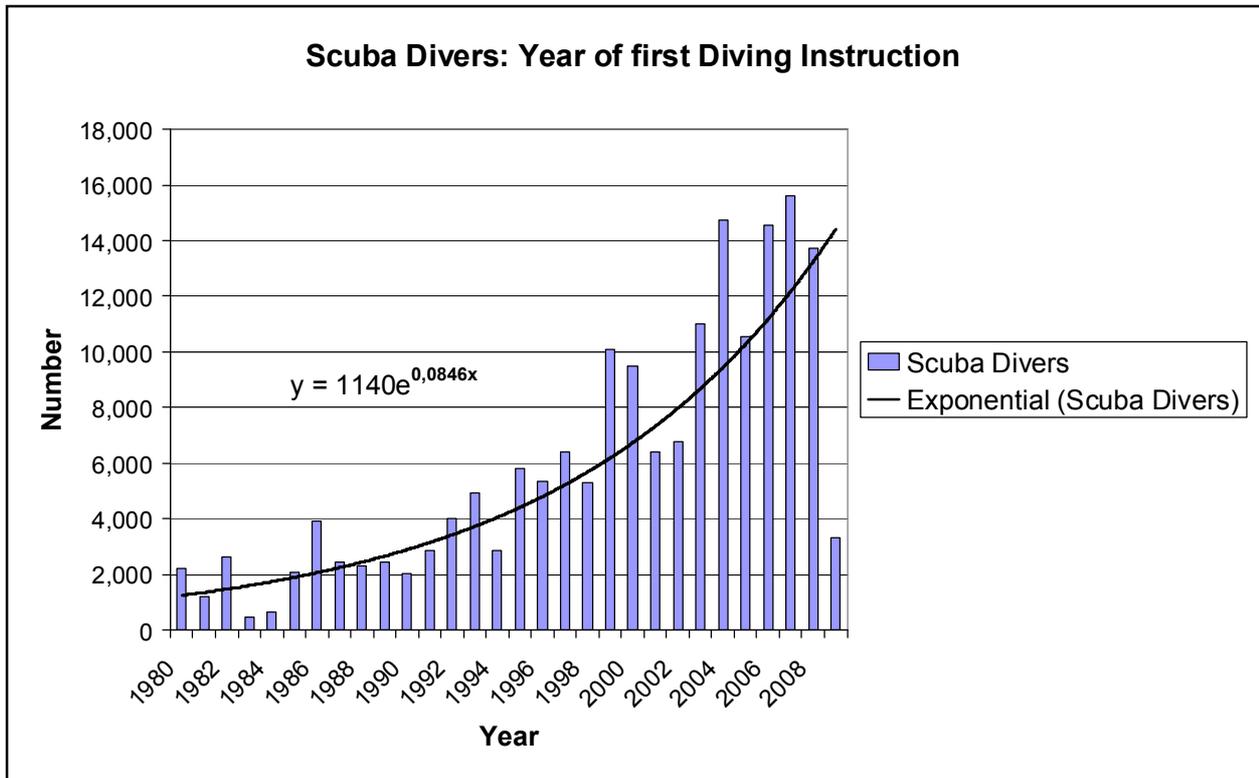

- Although 50% of male scuba divers of 40 to 55 years raise children a downward movement corresponding to females is indiscernible.

5 Year of First Diving Instruction

5.1 Scuba Divers

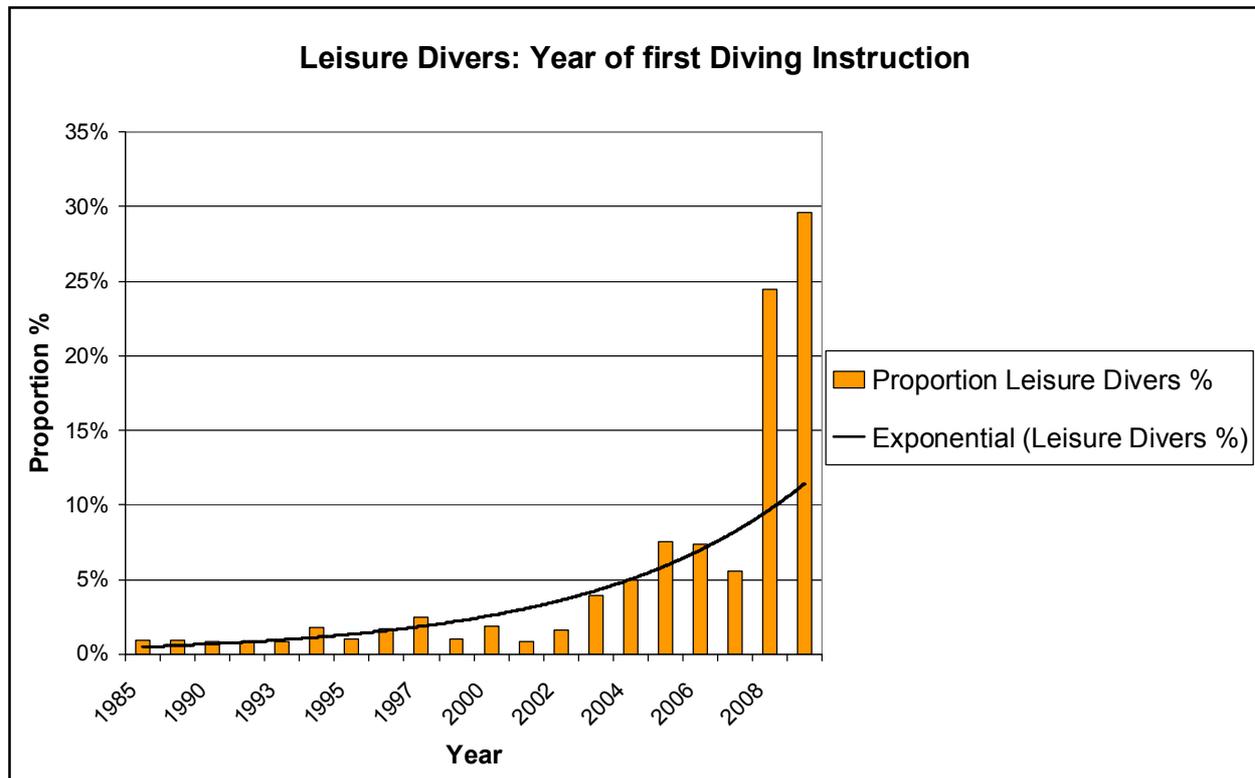

The following graph shows how many of today's scuba divers passed their initial training in which year.

The trend line for scuba divers on the time scale of initial training allows the following conclusion:

- Approx. 16,000 future scuba divers are trained p.a.
- The proportion of dropouts amounts to approx. 8.5% p.a.
- Approx. 1 to 2 years after their first instruction divers become eventually scuba divers (by supplying their own complete equipment).

5.2 Leisure Divers

We have to consider for the survey results for leisure divers that a good portion of this group supposedly visits specialized shops shortly after the initial training (and therefore has been informed about the survey).

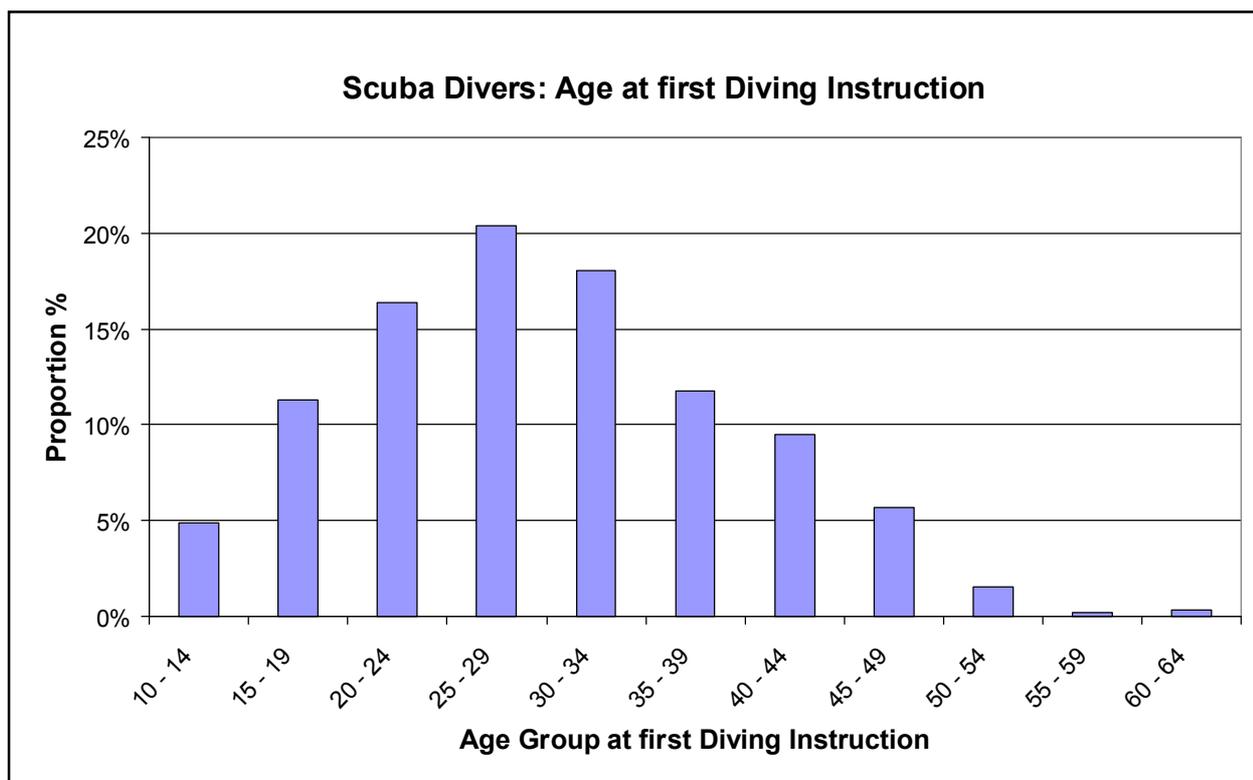

The trend line suggests the following behavior of this group:

- In the first years after initial training the "new" leisure divers visit specialized shops presumably to buy basic components of partial equipment.
- About 50% of future leisure divers are no longer visible in specialized shops after approx. 3 years after to the initial training.
- The remaining 50% stay in contact with specialized shops; the dropout rate averages approx. 10% p.a.

6 Age at First Diving Instructions

6.1 Scuba Divers

	Proportion %	Number of cases
Age-group at training	Scuba Divers	Scuba Divers
10 to 14	4.9%	31
15 to 19	11.3%	74
20 to 24	16.4%	124
25 to 29	20.4%	169
30 to 34	18.1%	146
35 to 39	11.7%	91
40 to 44	9.5%	71
45 to 49	5.7%	37
50 to 54	1.5%	8
55 to 59	0.2%	1
60 to 64	0.3%	1
Total	100.0%	753

- Scuba divers pass initial training at the age of 20 to 35. The proportion of initial trainings beyond to 50th birthday is very small.

6.2 Leisure Divers

	Proportion %	Number of cases
Age-group at training	Leisure Divers	Leisure Divers
10 to 14	17.1%	3
15 to 19	14.3%	10
20 to 24	17.6%	18
25 to 29	15.1%	17
30 to 34	11.2%	13
35 to 39	11.6%	13
40 to 44	5.3%	6
45 to 49	5.5%	5
50 to 54	2.3%	2
55 to 59	0.0%	
60 to 64	0.0%	
Total	100.0%	87

- Considering the small sample sizes and the observation that leisure divers are no longer visible after a few years past to their initial training: Nearly 90% of initial trainings take place prior to the 40th birthday roughly equally distributed over the age groups including adolescents.

6.3 Average age at initial training of today's age groups

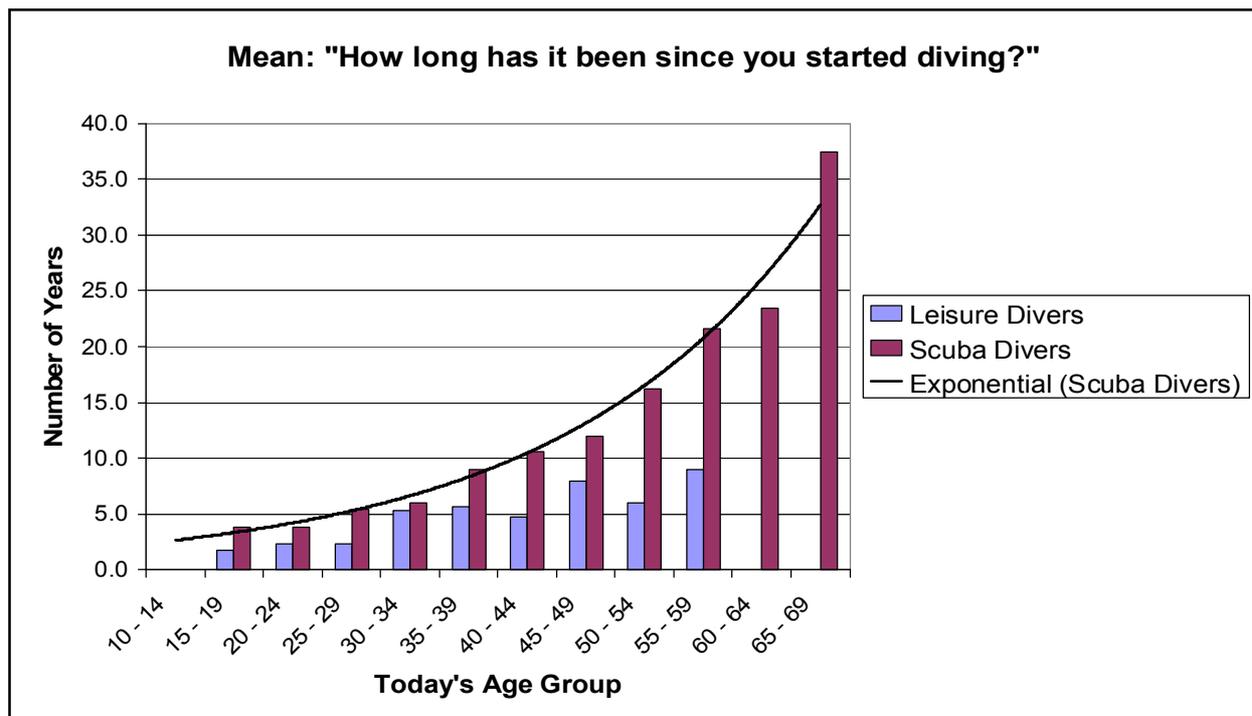

Averaged age at initial training			
Today's age group	Leisure Divers	Scuba Divers	Average
10 to 14	13.0		13.0
15 to 19	14.3	14.1	14.2
20 to 24	19.5	18.7	18.9
25 to 29	25.0	22.0	22.6
30 to 34	27.3	26.1	26.2
35 to 39	31.0	28.1	28.4
40 to 44	37.5	31.4	31.7
45 to 49	39.1	35.0	35.3
50 to 54	47.0	35.4	35.9
55 to 59	48.0	34.8	35.2
60 to 64		39.0	39.0
65 to 69		29.8	29.8
Average	29.1	29.5	29.4

- Today's scuba divers normally completed their initial training prior to an age of 35 even in the older age-group.
- For leisure divers the rising curve shows. that with all of today's age-groups only leisure divers with an initial training in the past few years are visible.

6.4 How long has it been since you started diving?

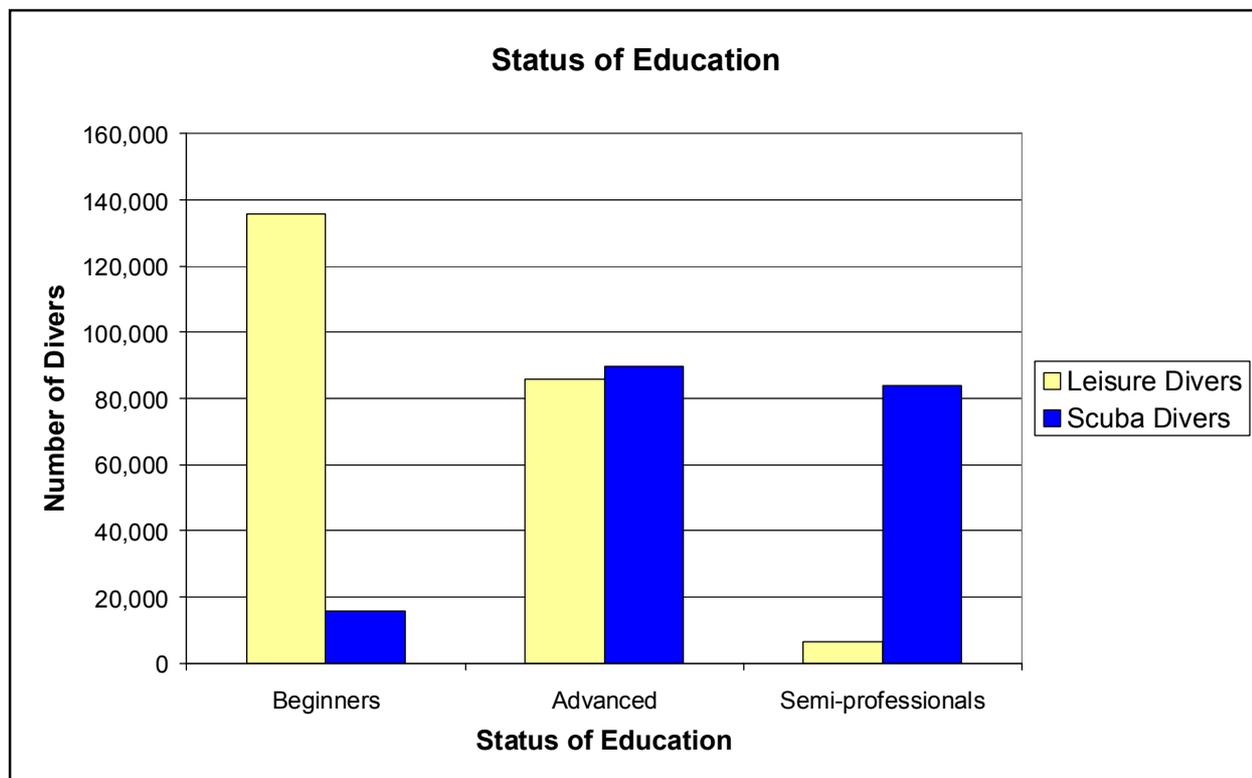

Average years of diving experience already			
Today's age-group	Leisure Divers	Scuba Divers	Average
10 to 14	0.0		0.0
15 to 19	1.8	3.8	3.2
20 to 24	2.3	3.9	3.6
25 to 29	2.4	5.4	4.8
30 to 34	5.3	6.0	5.9
35 to 39	5.7	9.0	8.6
40 to 44	4.7	10.6	10.3
45 to 49	8.0	12.0	11.7
50 to 54	6.0	16.3	15.9
55 to 59	9.0	21.6	21.3
60 to 64		23.4	23.4
65 to 69		37.4	37.4

- For scuba divers the curve progression confirms a linear loss of divers by approx. 8.5% annually starting at the age of 20 to 35 years at first initial training.
- For leisure divers the curve progression confirms that these are visible for specialist shops just 2 to 5 years after initial training (almost independent of age).

7 Status of Education

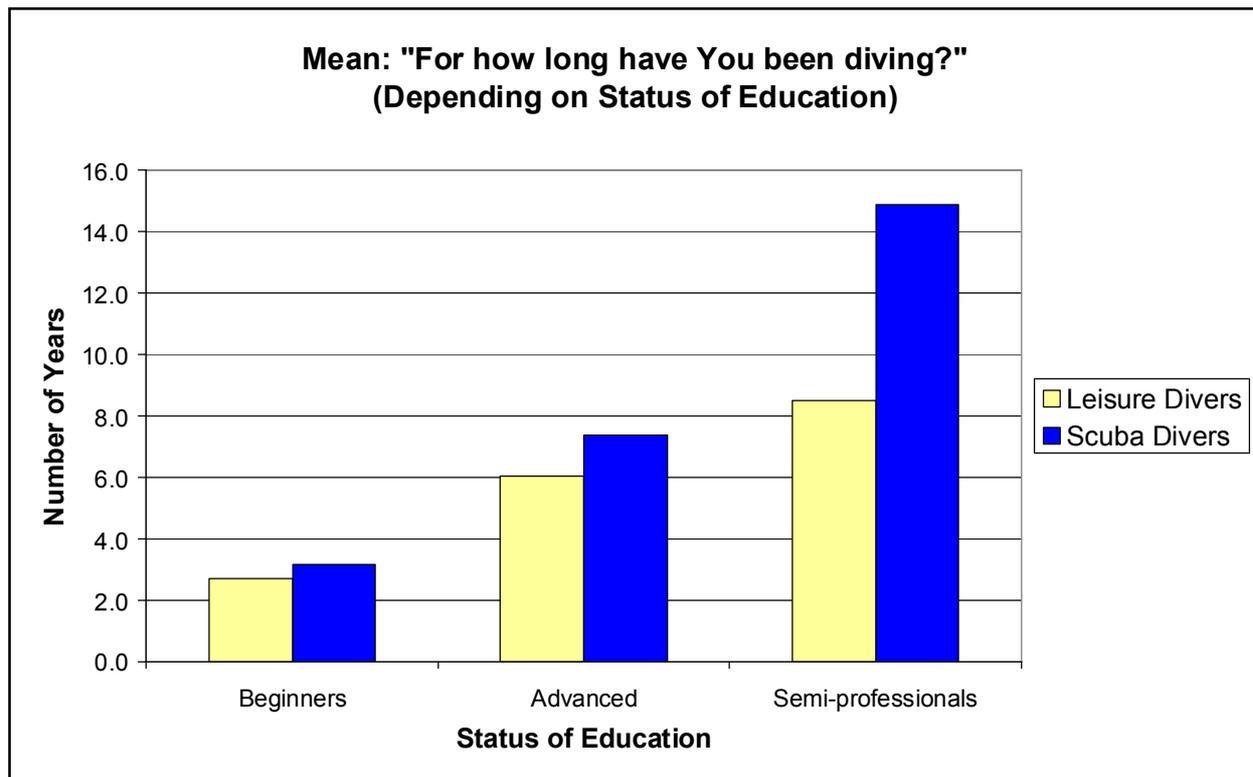

Number of divers			
Status of education	Leisure Divers	Scuba Divers	Total
Beginners	135,834	15,788	151,622
Advanced	85,722	89,651	175,373
Semi-professionals	6,580	83,853	90,433
Total	228,136	189,292	417,428

- Scuba divers predominantly have an advanced or semi-professional level of education.
- Leisure divers (observable in this survey) are mostly beginners and around one-third are advanced.

7.1 For how long have you been diving? (Depending on Education)

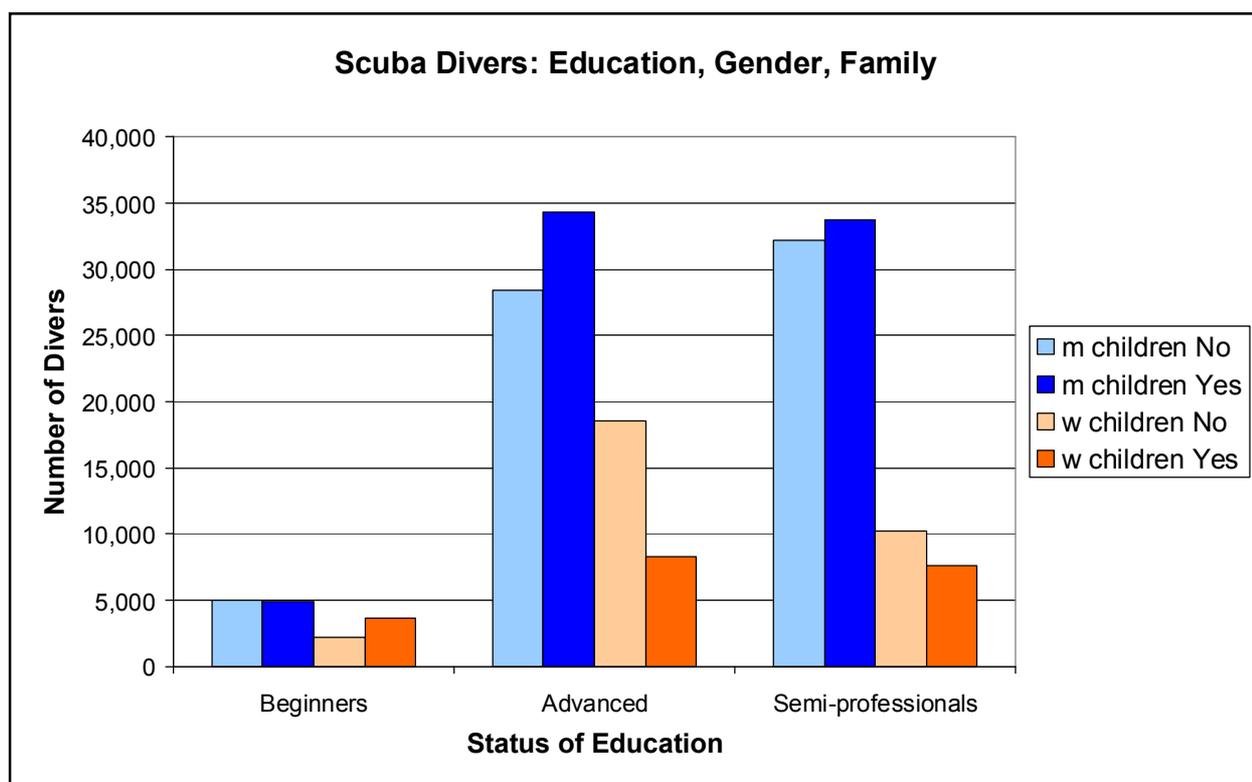

Average years of diving experience			
Status of education	Leisure Divers	Scuba Divers	Average
Beginners	2.7	3.2	3.0
Advanced	6.0	7.4	7.2
Semi-professional	8.5	14.9	14.8

- Both scuba divers and leisure divers average as for Beginners around 3 years and Advanced 6 to 7 years of experience.
- Scuba diving semi-professionals have been diving for about 15 years; few semi-professionals without own equipment for about 9 years.

7.2 Education, Gender, Family

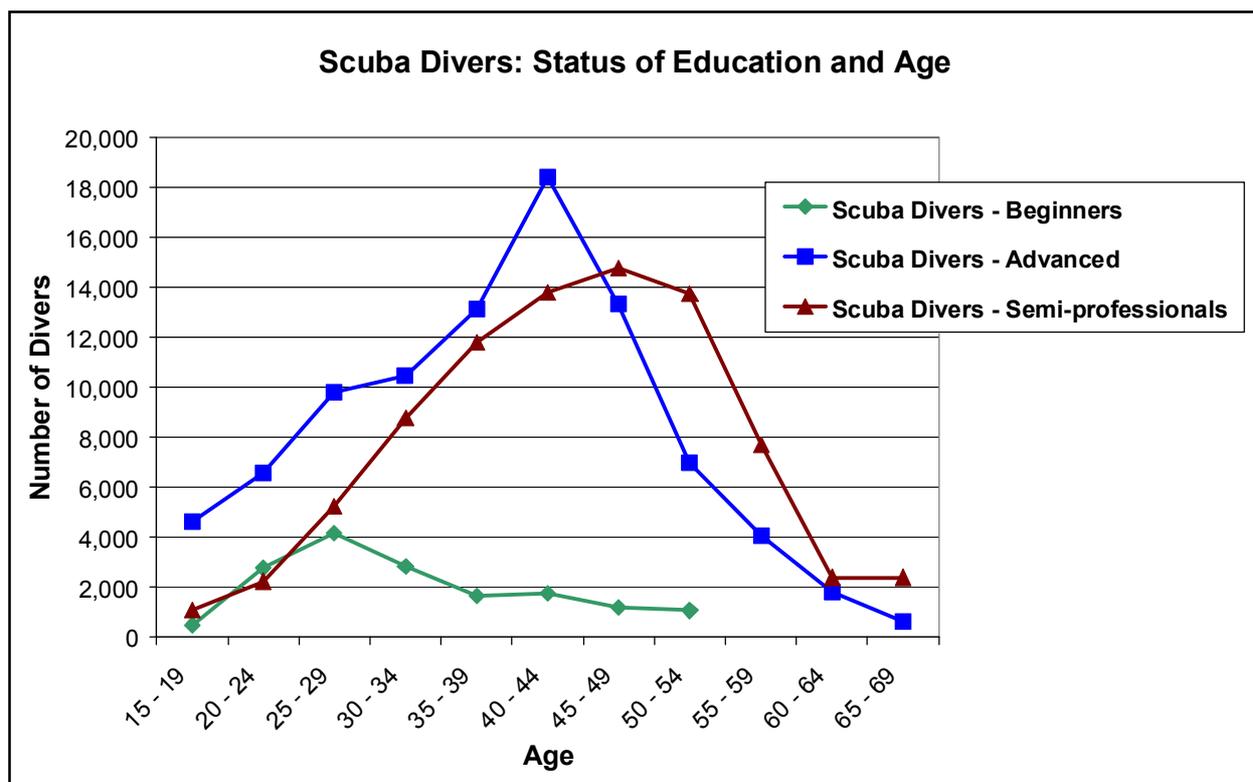

Number of Divers	Scuba Divers			
	Men		Women	
	Children no	Children yes	Children no	Children yes
Beginners	5,021	4,941	2,168	3,658
Advances	28,461	34,335	18,578	8,276
Semi-professionals	32,237	33,728	10,276	7,613
In total	65,719	73,003	31,022	19,547

- With an increasing level of education scuba divers are mainly men.
- The majority of scuba diving women are childless.
- Scuba diving women mainly remain at an advanced stage.
- One-half of scuba diving men have children.

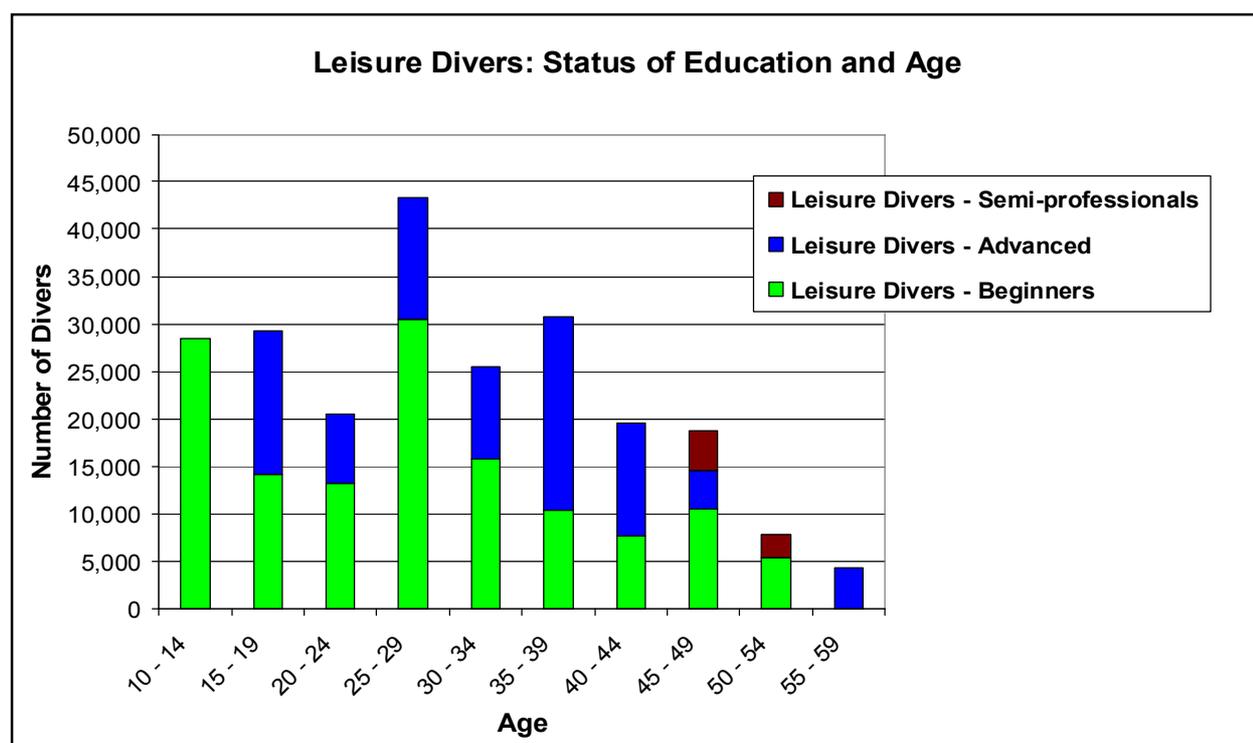

7.3 Educational Status and Age

Number of Divers				
Age Group	Scuba Divers			Total
	Beginners	Advanced	Semi-professionals	
15 to 19	476	4,601	1,058	6,134
20 to 24	2,737	6,544	2,221	11,501
25 to 29	4,158	9,776	5,214	19,148
30 to 34	2,809	10,473	8,787	22,069
35 to 39	1,634	13,132	11,798	26,564
40 to 44	1,748	18,423	13,800	33,970
45 to 49	1,180	13,311	14,768	29,259
50 to 54	1,047	6,951	13,754	21,751
55 to 59		4,061	7,697	11,758
60 to 64		1,784	2,379	4,163
65 to 69		595	2,379	2,973
Total	15,788	89,651	83,853	189,292

- For scuba divers it is remarkable that in advanced divers of the age group of 45 to 49 years there is a rapid age-related decrease; for semi-professionals this occurs approx. 5 years later.
- Scuba divers of 60+ are rare.

Number of Divers				
	Leisure Divers			
Age Group	Beginners	Advanced	Semi-professionals	Total
10 to 14	28,513			28,513
15 to 19	14,140	15,120		29,260
20 to 24	13,160	7,315		20,475
25 to 29	30,464	12,852		43,316
30 to 34	15,748	9,738		25,486
35 to 39	10,394	20,361		30,754
40 to 44	7,633	11,875		19,508
45 to 49	10,418	4,167	4,167	18,753
50 to 54	5,364		2,413	7,777
55 to 59		4,293		4,293
Total	135,834	85,722	6,580	228,136

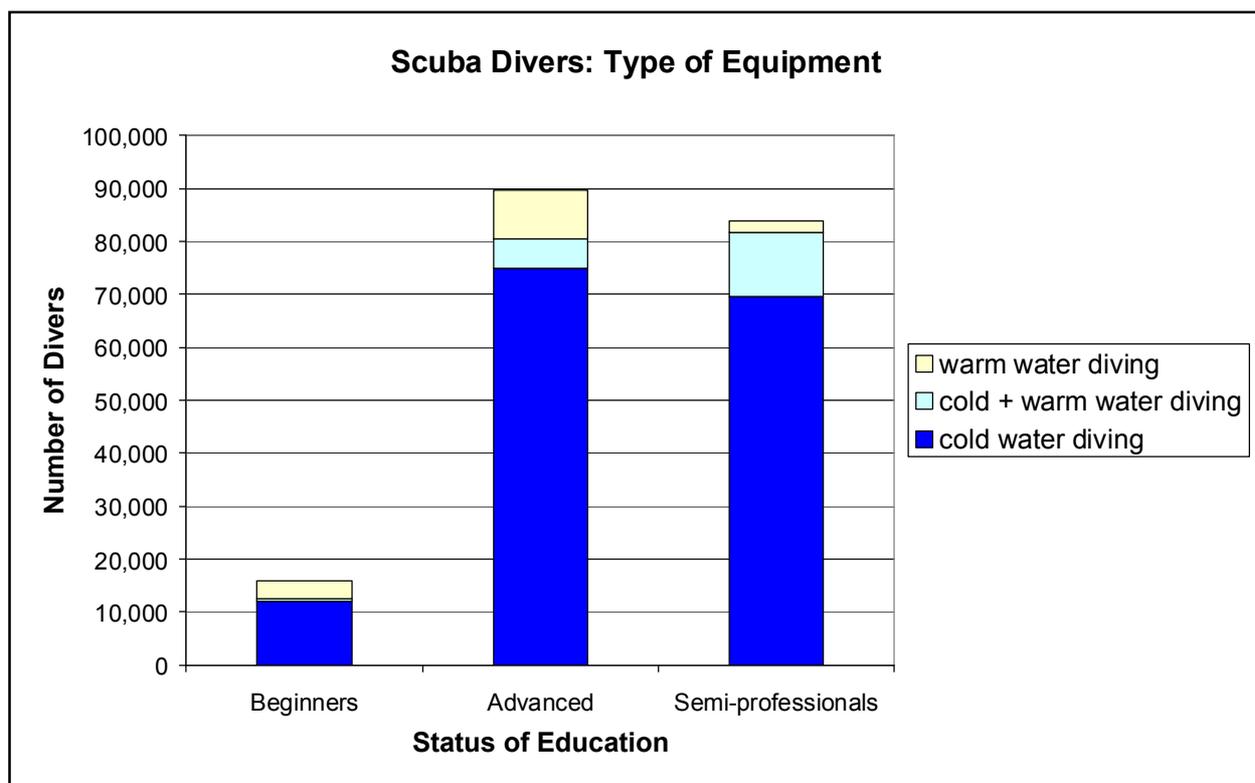

Considering the small sample sizes:

- With an increasing age (experience) leisure divers develop from beginners to advanced.
- The pool of leisure divers remains all about the same for all age groups; but at the age of 45 an age-related decrease starts (apart from the few semi-professionals).

8 Equipment

Equipment and educational level

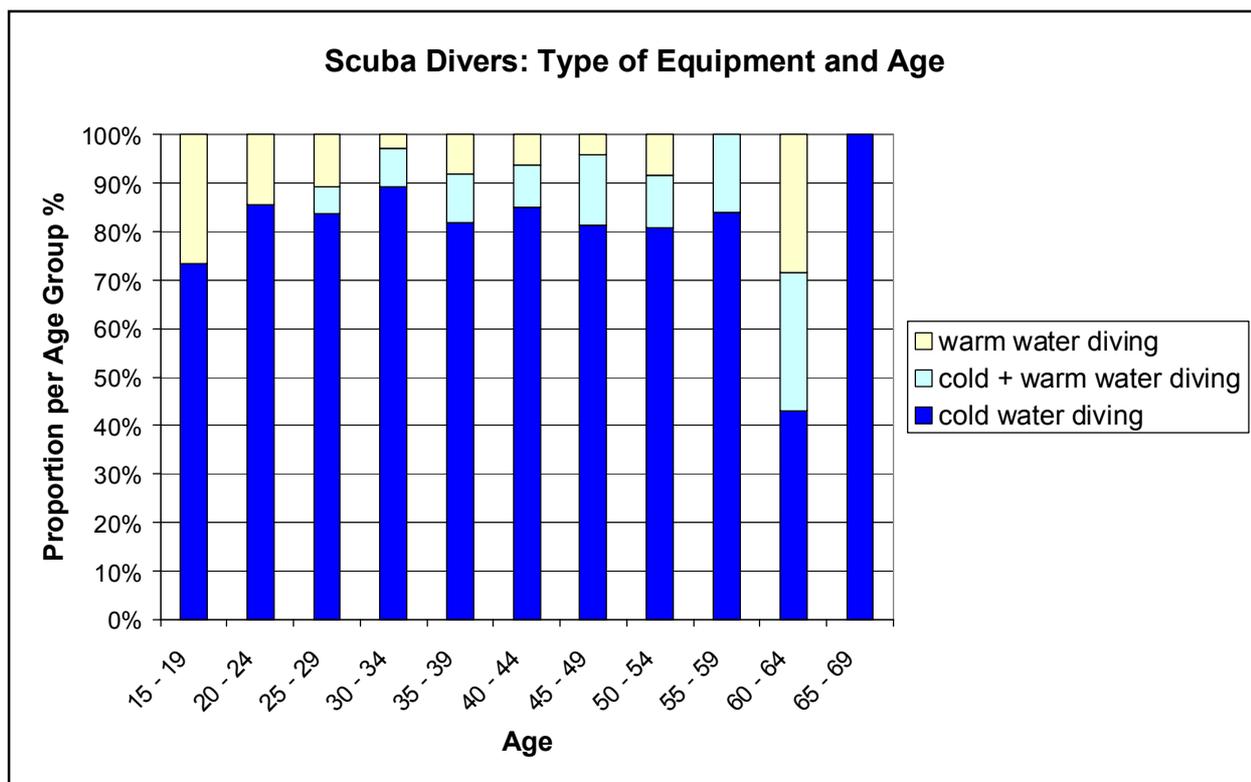

Number of Divers		Scuba Divers		
Educational level	Cold water	Cold + Warm water	Warm water	Total
Beginners	12,082	450	3,256	15,788
Advanced	74,942	5,496	9,213	89,651
Semi-professionals	69,555	12,235	2,064	83,853
Total	156,579	18,180	14,533	189,292

- Most of the scuba divers possess equipment suitable for cold water. With growing educational level eventually additional warm water equipment is acquired.

Equipment and Age

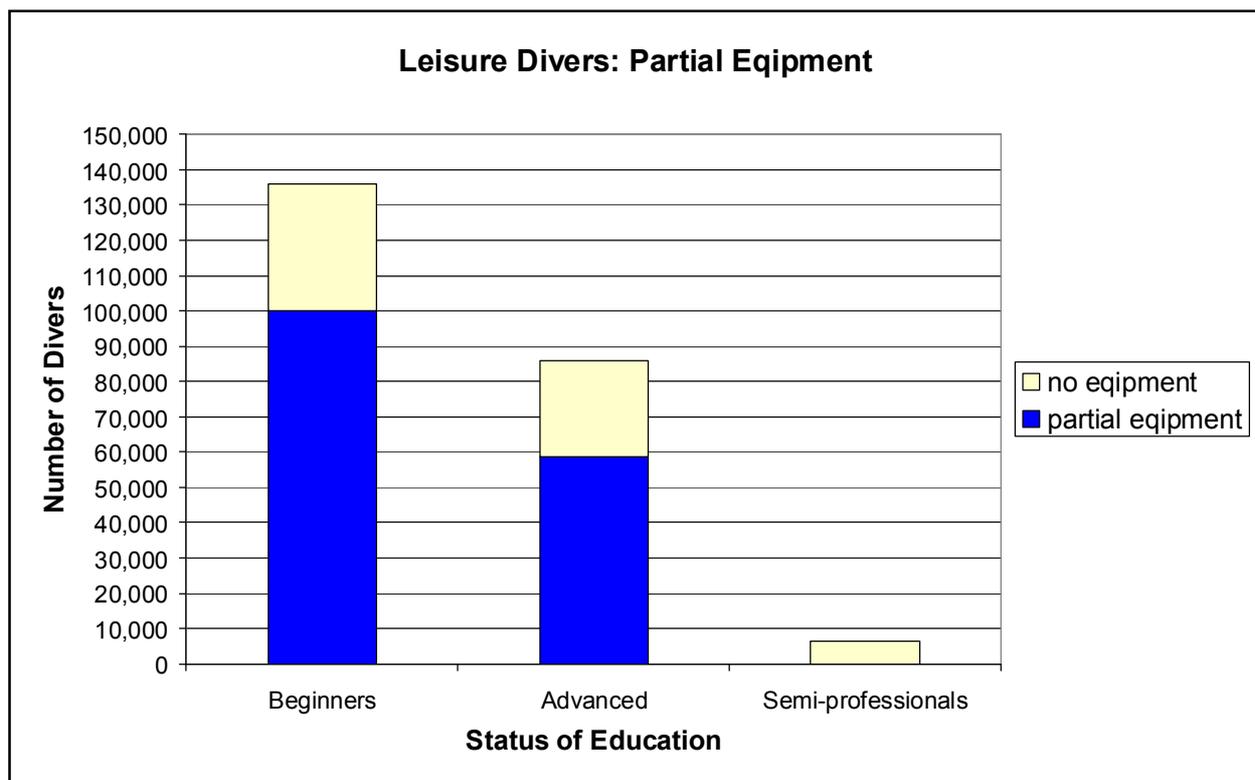

Rate / Age Group %	Scuba divers		
Age Group	Cold water	Cold + Warm water	Warm water
15 to 19	73%	0%	27%
20 to 24	86%	0%	14%
25 to 29	84%	6%	11%
30 to 34	89%	8%	3%
35 to 39	82%	10%	8%
40 to 44	85%	9%	6%
45 to 49	81%	14%	4%
50 to 54	81%	11%	8%
55 to 59	84%	16%	0%
60 to 64	43%	29%	29%
65 to 69	100%	0%	0%
Average	83%	10%	8%

- About 20% of scuba divers own warm water equipment,
- But with increasing age (at about 30) 90% have (additionally) suitable equipment for cold water.
- Remark: The tendency at the age group 60plus are based on very small sample sizes.

Leisure divers with partial equipment

Number of divers	Leisure divers		
Educational level	Partial equipment	No equipment	Total
Beginners	99,872	35,962	135,834
Advances	58,660	27,062	85,722
Semi-professionals		6,580	6,580
Total	158,531	69,605	228,136

Considering the small sample sizes:

- Obviously the majority of leisure divers (approx. 70%) purchased parts of equipment during or shortly after their initial training.

9 Dives

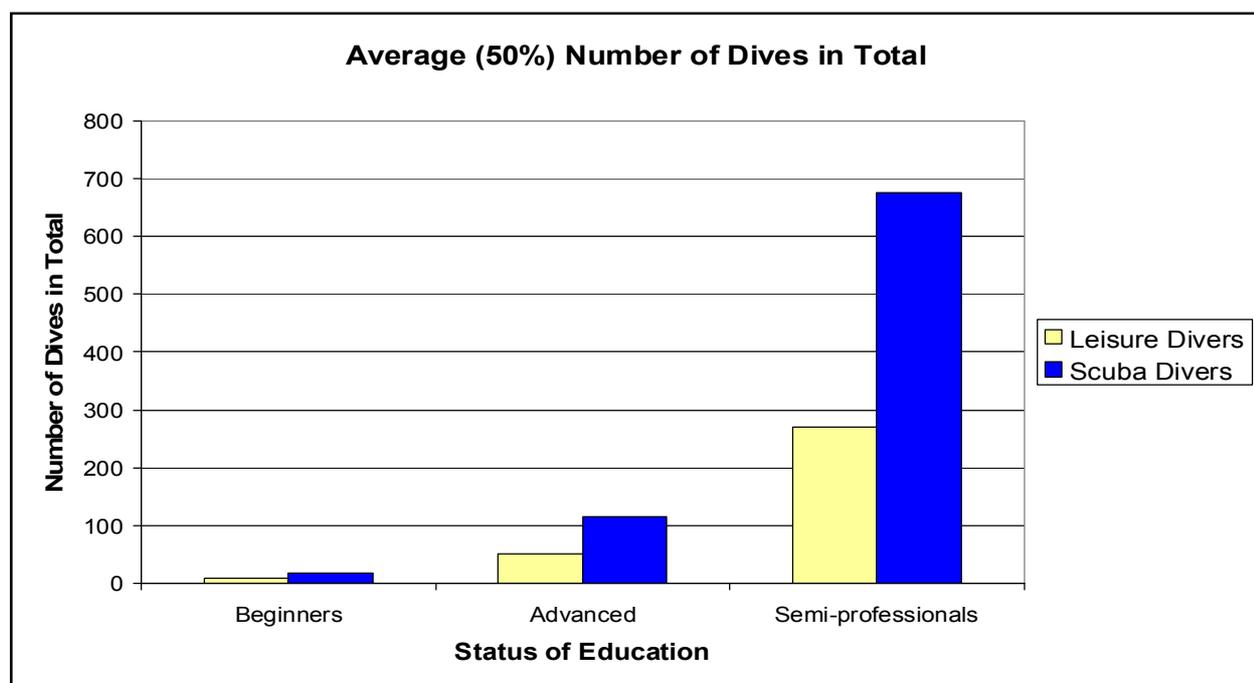

9.1 Dives in Total

For the following tables the appropriate frequency distribution has been counted.

Meaning of the columns:

- 10%** Lower limit:
10% of the divers in this category are below this parameter value, 90% above.
- 50%** Average:
50% of the divers in this category are below this parameter value, 50% above.
- 90%** Upper limit:
90% of the divers in this category are below this parameter value, 10% above.

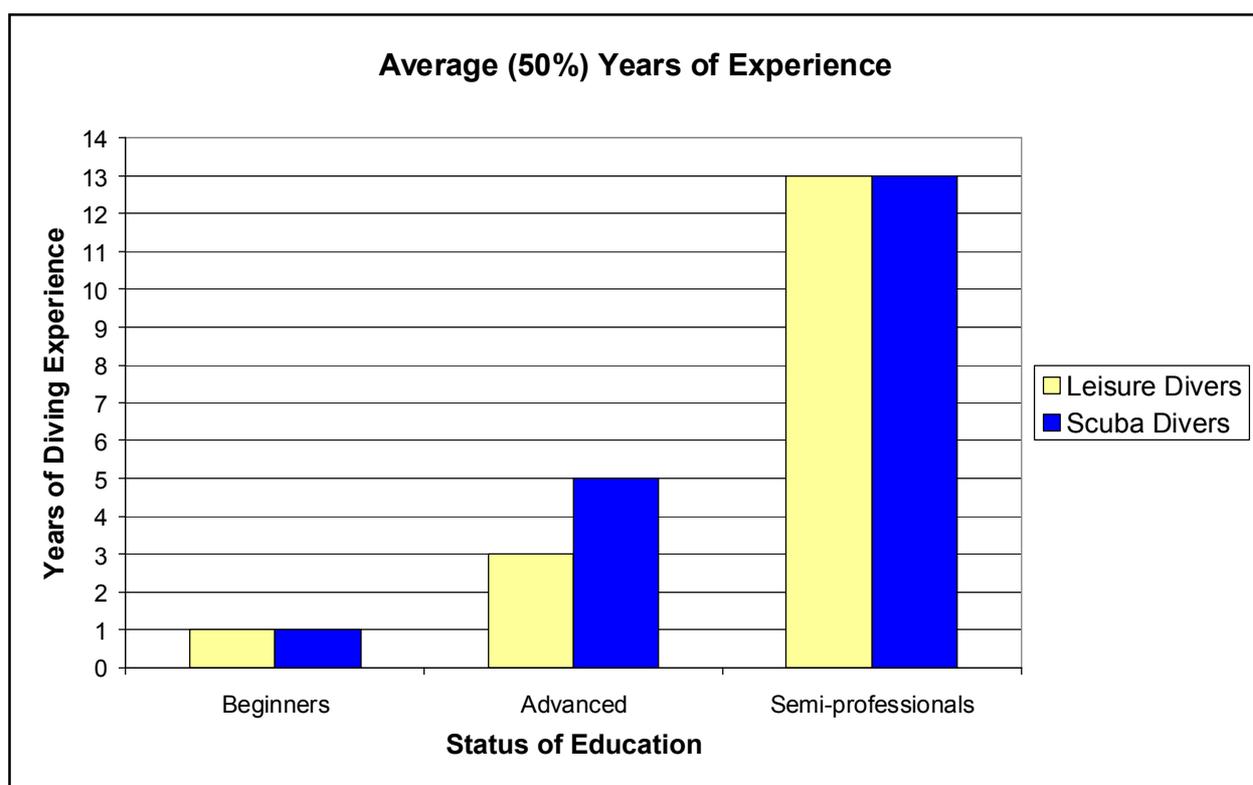

Diversification Number of Dives in Total (%)						
Educational level	Leisure Divers			Scuba Divers		
	10%	50%	90%	10%	50%	90%
Beginners	2	9	35	5	18	80
Advanced	13	50	150	40	115	400
Semis-professionals	250	270	280	192	675	2.800
Mean	2	18	83	36	220	1.410

- Expectedly, at all educational levels scuba divers passed on average (50%) twice as much dives in total than leisure divers did.

9.1.1 For how many years have you been diving?

Distribution number of years in total (%)						
Educational Level	Leisure Divers			Scuba Divers		
	10%	50%	90%	10%	50%	90%
Beginners	0	1	6	0	1	6
Advanced	1	3	15	1	5	16
Semi-professionals		13		4	13	30
Average	0	1	12	1	8	25

- Both among scuba divers as well as among leisure divers, beginners have, on average, been actively diving for one year.
- Within 6 years (90%) beginners start further training to get an advanced level (or they quit active diving).
- Advanced divers have been active for 3 to 5 years on average.
- Semi-professionals (44% of scuba divers) have been active for 13 years.

9.2 Dives Yearly

9.2.1 Averaged Dives Yearly in Total

Diversification averaged dives yearly						
	Leisure divers			Scuba divers		
	10%	50%	90%	10%	50%	90%
Beginners	2.4	8.6	19	2.8	12.4	21
Advanced	4.4	16.7	33.5	9.9	24.7	63.8
Semi-professionals		20		23.1	59.7	135.5
Mean	3.8	13.4	33.5	11.9	35.2	103.3

9.2.2 Dives 2008

Diversification dives 2008						
	Leisure Divers			Scuba Divers		
	10%	50%	90%	10%	50%	90%
Beginners	0	0.5	10	0	9.5	29
Advanced	0.5	11	25	4.5	25	70
Semi-professionals	0	40	0	19	71	150
Mean	0	5.5	23	5	39	120

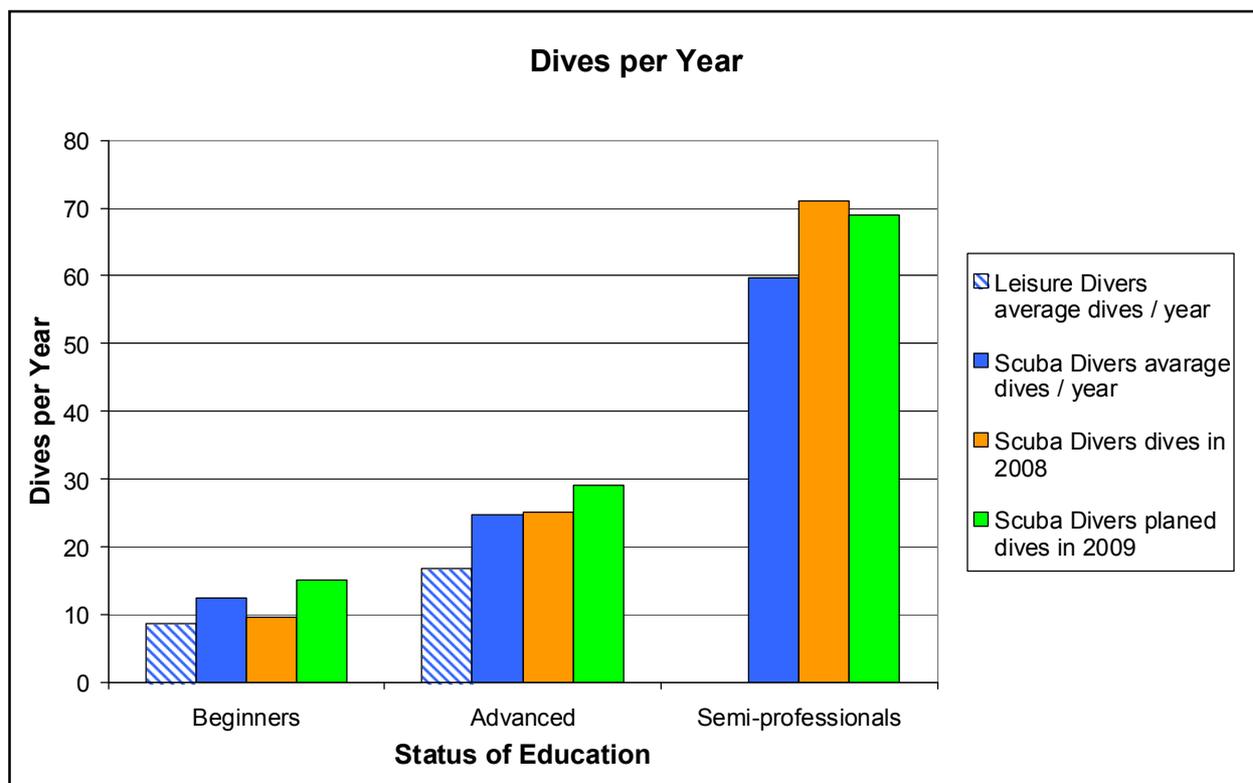

9.2.3 Intended Dives 2009

Diversification intended dives 2009						
	Leisure Divers			Scuba Divers		
	10%	50%	90%	10%	50%	90%
Beginners	1	9.5	19	3.5	15	30
Advanced	1	9.5	39	9	29	75
Semi-professionals		29		24	69	160
Mean	1	9.5	29	10	40	120

9.2.4 Summary: Number of Dives per annum: Average in Total / 2008 / 2009

Average values (50%) by comparison:

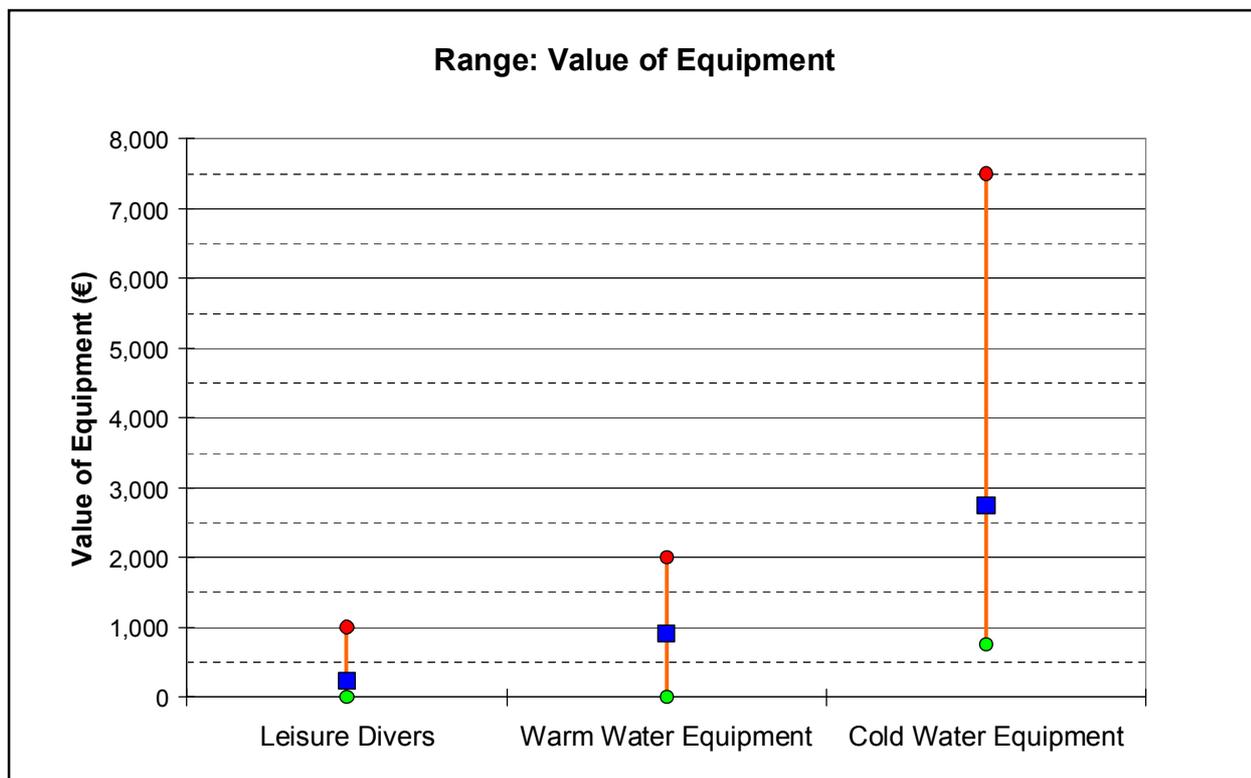

Averaged values (50%) Dives Yearly						
	Leisure Divers			Scuba Divers		
	Averaged number yearly	Dives 2008	intended dives 2009	Averaged number yearly	Dives 2008	Intended dives 2009
Beginners	8.6	0.5	9.5	12.4	9.5	15
Advanced	16.7	11	9.5	24.7	25	29
Semi-professionals	20	40	29	59.7	71	69
Mean	13.4	5.5	9.5	35.2	39	40

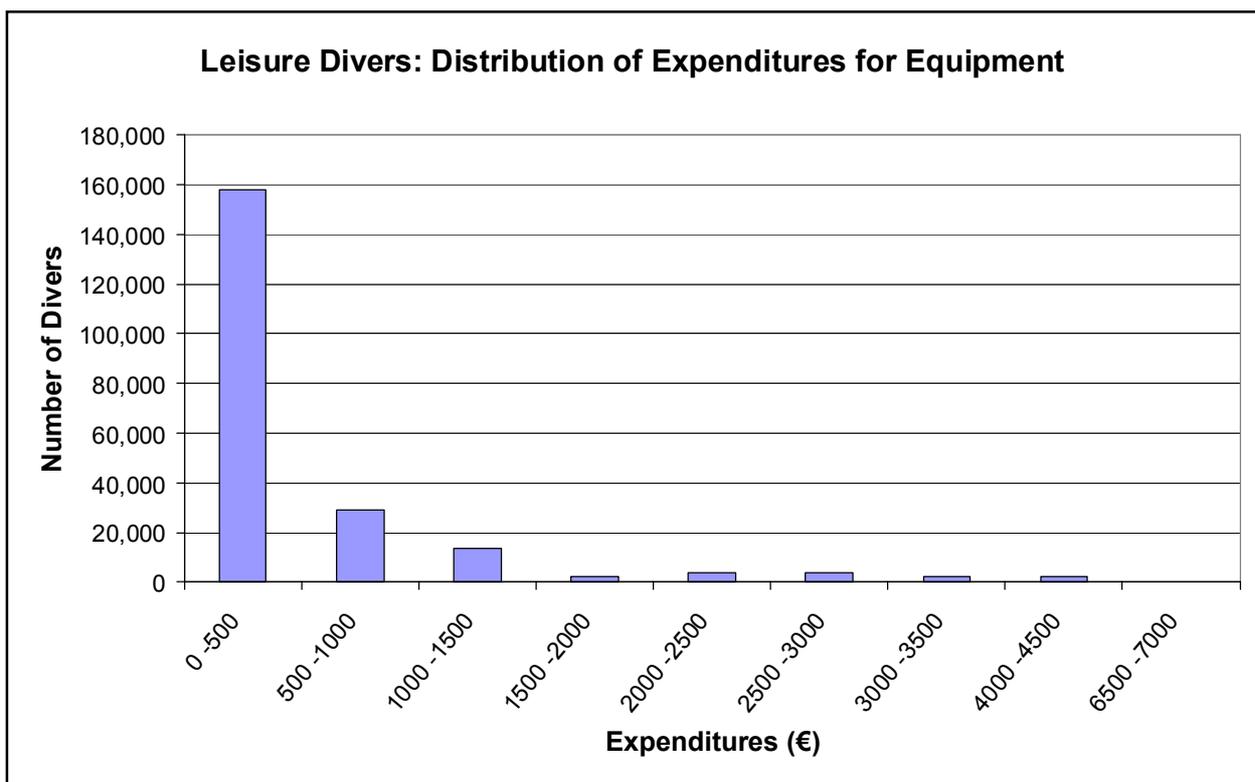

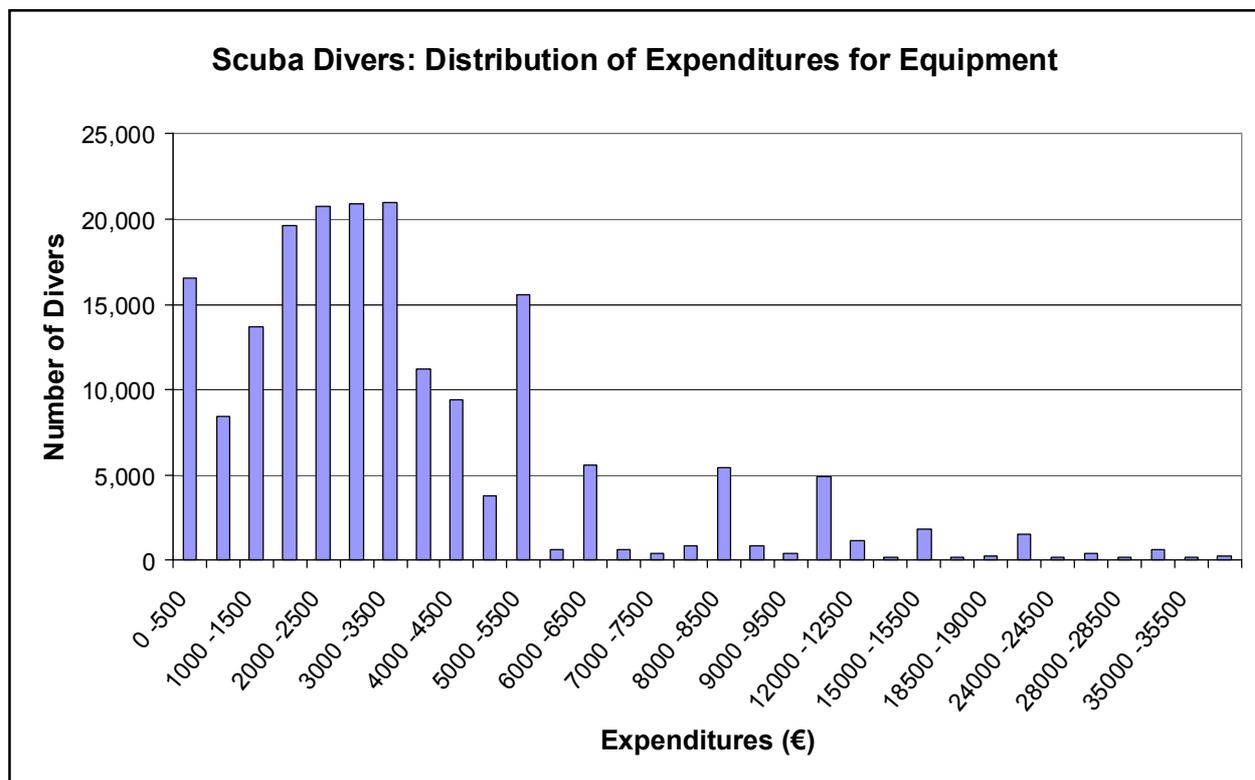

- The data of scuba divers (with own equipment) are continuously:
 - Average dives/year: 35 to 40
 - Beginners: 10 to 15
 - Advanced: 25 to 30
 - Semi-professionals: 60 to 70
- The data of leisure divers are non-uniform considering the small sample sizes:
 - Beginners: average approx. 0 to 10 dives/year
 - Advanced: average approx. 10 to 15 dives/year

10 Expenditure for Existing Equipment

Value of Equipment			
Type of Equipment	10%	50%	90%
Leisure divers	0	230	1,000
Cold water	750	2,750	7,500
Cold+ warm water	1,200	3,000	7,000
Warm water	0	910	2,000

- Leisure divers (without owned full equipment) invest averages (50%) around **230 €** for their partial equipment.
- The cost for warm water equipment averages about **910 €**.
- Scuba divers invest for a complete cold water or cold- and warm water equipment on average
 between **2,700 to 3,000 €**,
 up to maximum of 7,500 €

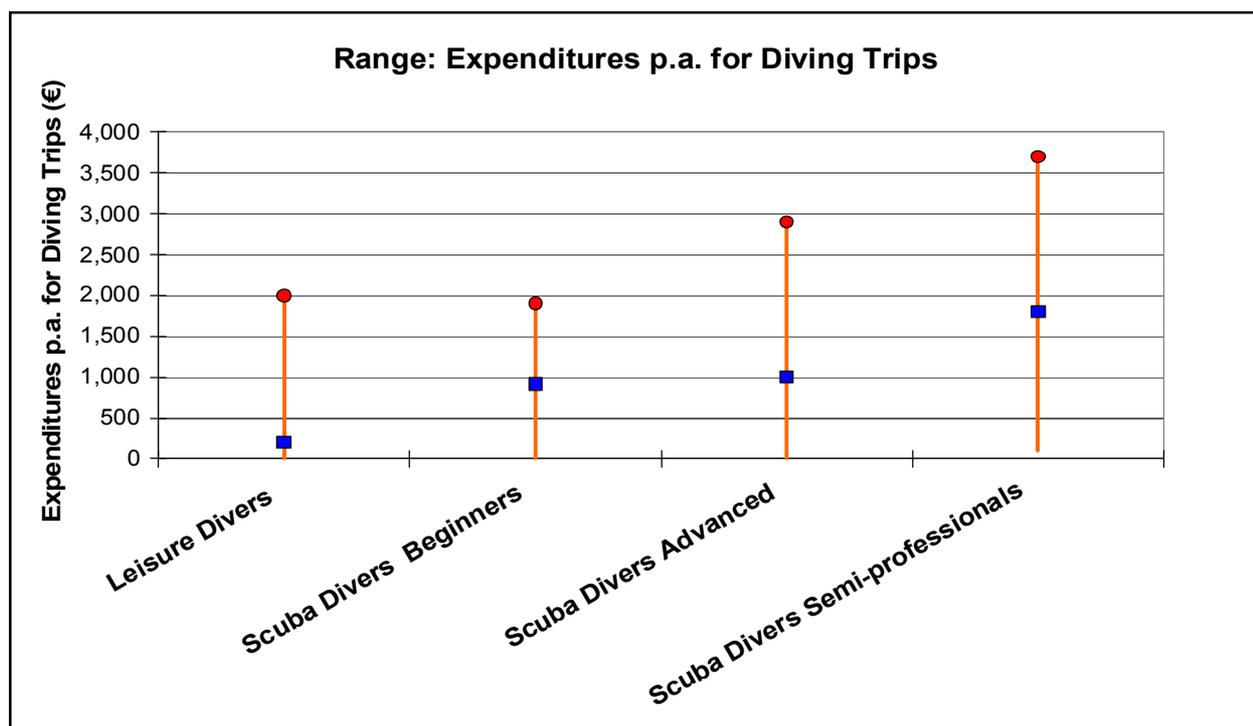

- Scuba divers mostly spend 1,500 to 3,500 € for their equipment.
- Leisure divers spend rarely more than 500 €.

11 Yearly Expenditure

11.1 For Diving Trips

Expenditures Yearly for Diving Trips			
	10%	50%	90%
Leisure divers	0	200	2,000
Scuba divers	700	1,400	3,000

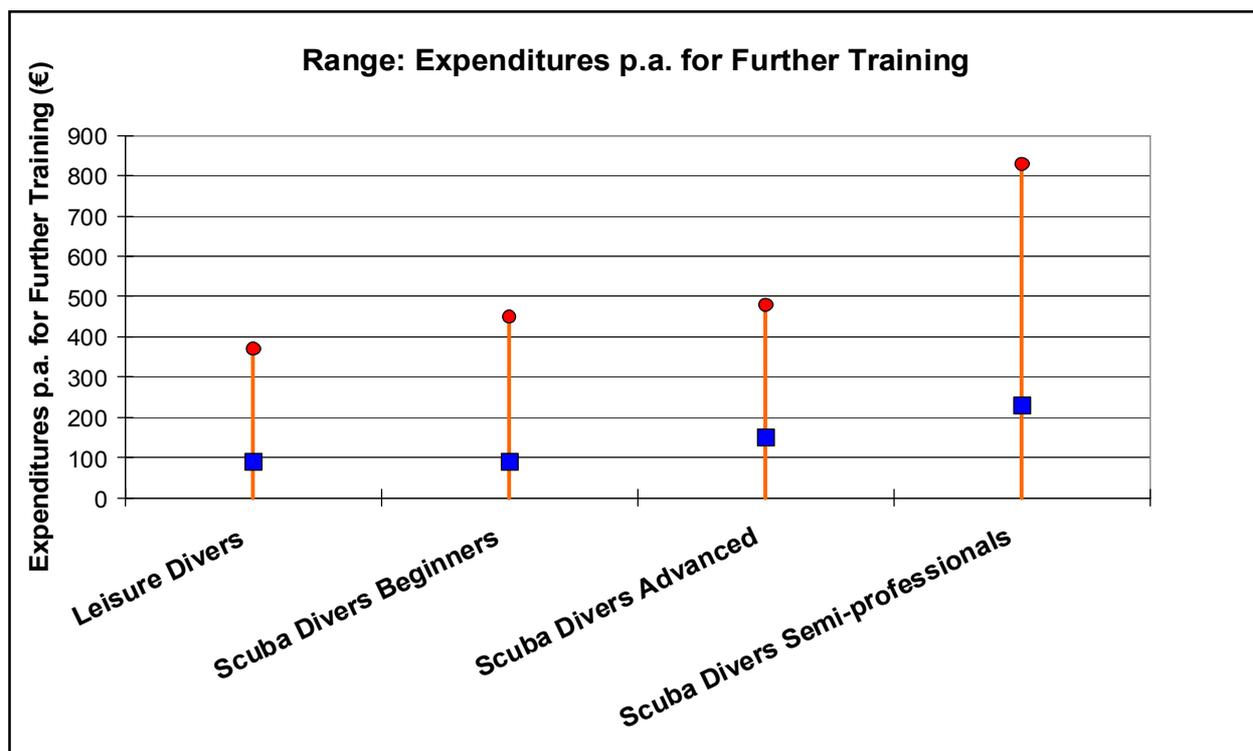

Expenditures Yearly for Diving Trips			
	Scuba Divers		
	10%	50%	90%
Beginners	0	920	1,900
Advanced	0	1,000	2,900
Semi-professionals	100	1,800	3,700

- The expenditure by scuba divers and leisure divers differs very much:
 Leisure divers spend on average **200 €/Year**,
 Scuba divers on average **1.400 €/Year**
 for diving trips.
- Scuba diving semi-professionals spend for their diving trips even
 on average **1.800 €/year**
 up to **3.700 €/year**

11.2 For Courses and Further Training

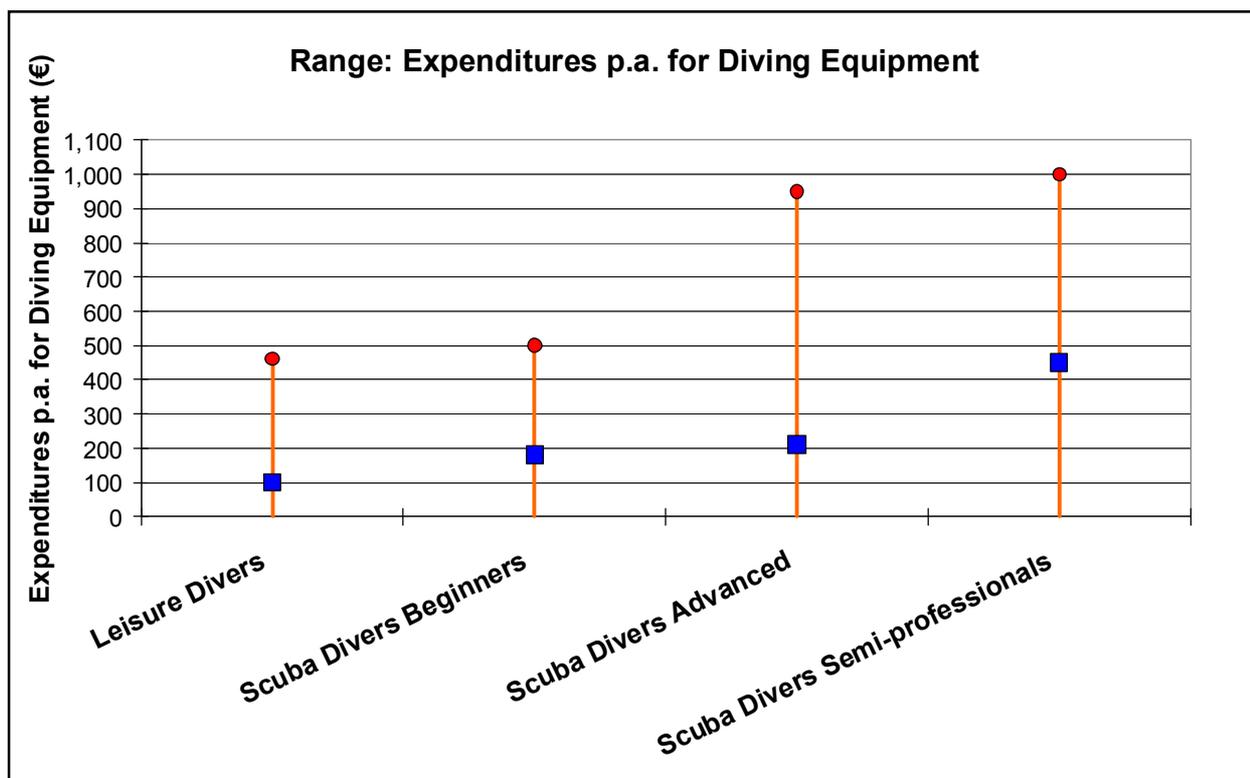

Expenditures Yearly for Further Training						
Educational level	Leisure Divers			Scuba Divers		
	10%	50%	90%	10%	50%	90%
Beginners	0	90	340	0	90	450
Advances	0	140	390	0	150	480
Semi-professionals	0	400		0	230	830
Mean	0	90	370	0	170	500

- The yearly expenditure for courses and further training clearly rises according to the educational level.
- On average (50%) beginners and advanced divers spend - with or without own equipment (scuba divers / leisure divers) - all about the same for courses and further training:
 - beginners: about 90 €/year
 - advanced: about 150 €/year
- The range of additional expenses for further training (90%) is certainly much wider for the case of scuba divers:
 - 10 % of beginners spend more than 450 €/year,
 - 10 % of advanced spend more than 480 €/year,
 - 10 % of semi-professionals more than 830 €/year.

11.3 For Diving Equipment

Expenditures Yearly for Diving Equipment						
Educational level	Leisure Divers			Scuba Divers		
	10%	50%	90%	10%	50%	90%
Beginners	0	90	480	0	180	500
Advanced	0	90	300	0	210	950
Semi-professionals		280		0	450	1,000
Mean	0	100	460	0	280	980

- Scuba divers (with own equipment) spend on yearly average (50%) more than twice as much for their equipment than leisure divers do (for their partial equipment).
- The yearly expenditure by scuba divers for service and maintenance of their equipment rise averaged with the educational level:
 - beginners: 180 €/year (up to 500 €/year),
 - advanced: 210 €/year (up to 950 €/year),
 - Semi-professionals: 450 €/year (up to 1,000 €/year)

11.4 Forecast: Estimated Market Volume

It must be pointed out that in this forecast:

- As "expenditures per diver" the aforementioned "averaged" values (50%) are generally used.
- The projection for leisure divers is based on relatively small sample sizes and – therefore - has to be regarded as a rough trend.
- At sales to leisure divers of diving equipment and further training thought has been given to the point that a good deal of divers are “visible” to specialized shops only for a few years after passing initial training. Estimation is that approx. 50% of the leisure divers will be “active” in long-term and will do appreciable business regularly.
Nevertheless: At the forecast for **diving trips** the total of leisure dives has been taken into account.
- The data allow no indication if and to what extent
 - a) Purchases are made at specialized shops or at other suppliers,
 - b) Purchases are made in Germany or abroad (e.g. at vacation resort).

11.4.1 Diving Equipment

Diving Equipment			
	Leisure Divers	Scuba Divers	Total
Number of divers	230,000	190,000	420,000
Number active divers 50%	115,000		
Beginners per year	23,000	16,000	39,000
Expenses once-only at start per diver	230 €	2,500 €	
Running expenses p.a. per diver	100 €	280 €	
Volume at start per year	5,290,000 €	40,000,000 €	45,290,000 €
Volume running per year	11,500,000 €	53,200,000 €	64,700,000 €
Total volume per year	16,790,000 €	93,200,000 €	109,990,000 €

11.4.2 Courses and Further Training

Courses and Further Training			
	Leisure Divers	Scuba Divers	Total
Number of divers	230,000	190,000	420,000
Number active divers (50%)	115,000		
Averaged expenses p.a. per diver	90 €	170 €	
Volume per year	10,350,000 €	32,300,000 €	42,650,000 €

11.4.3 Diving Trips

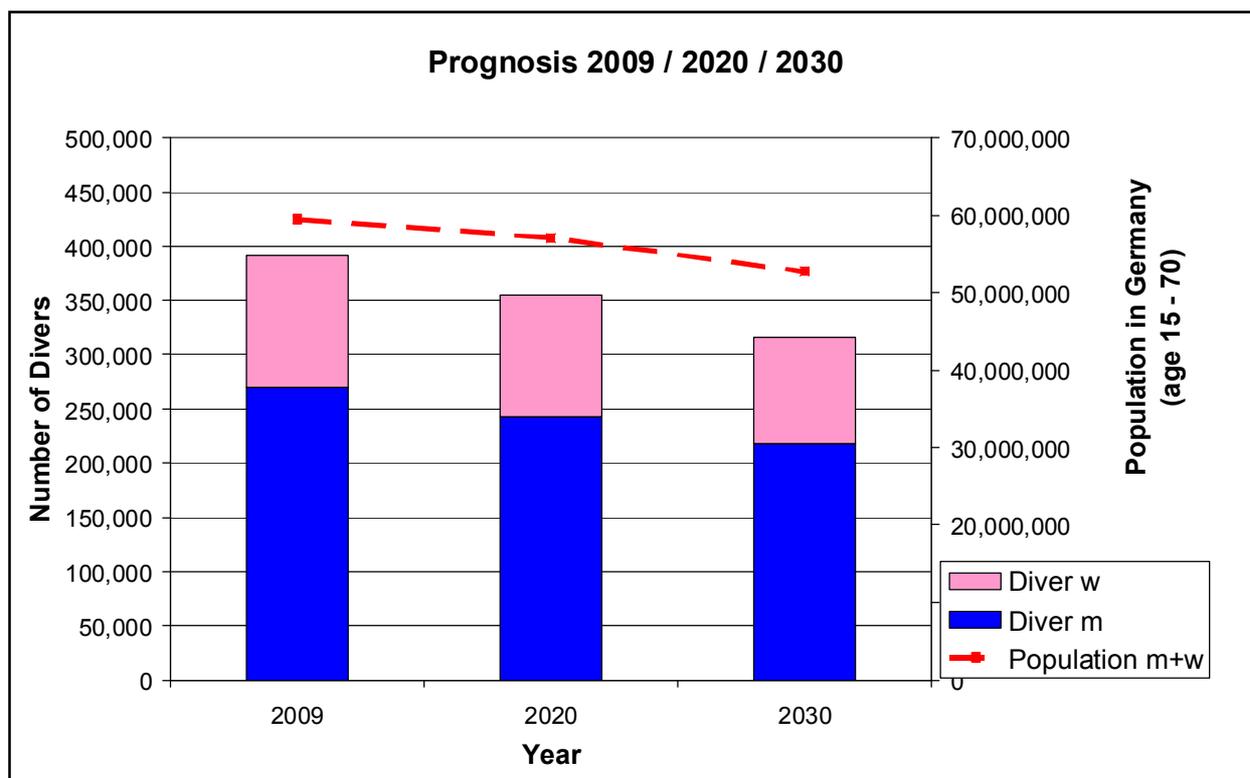

Diving Trips			
	Leisure Divers	Scuba Divers	Total
Number of divers	230,000	190,000	420,000
Averaged expenses p.a. per diver	200 €	1,400 €	
Volume per year	46,000,000 €	266,000,000 €	312,000,000 €

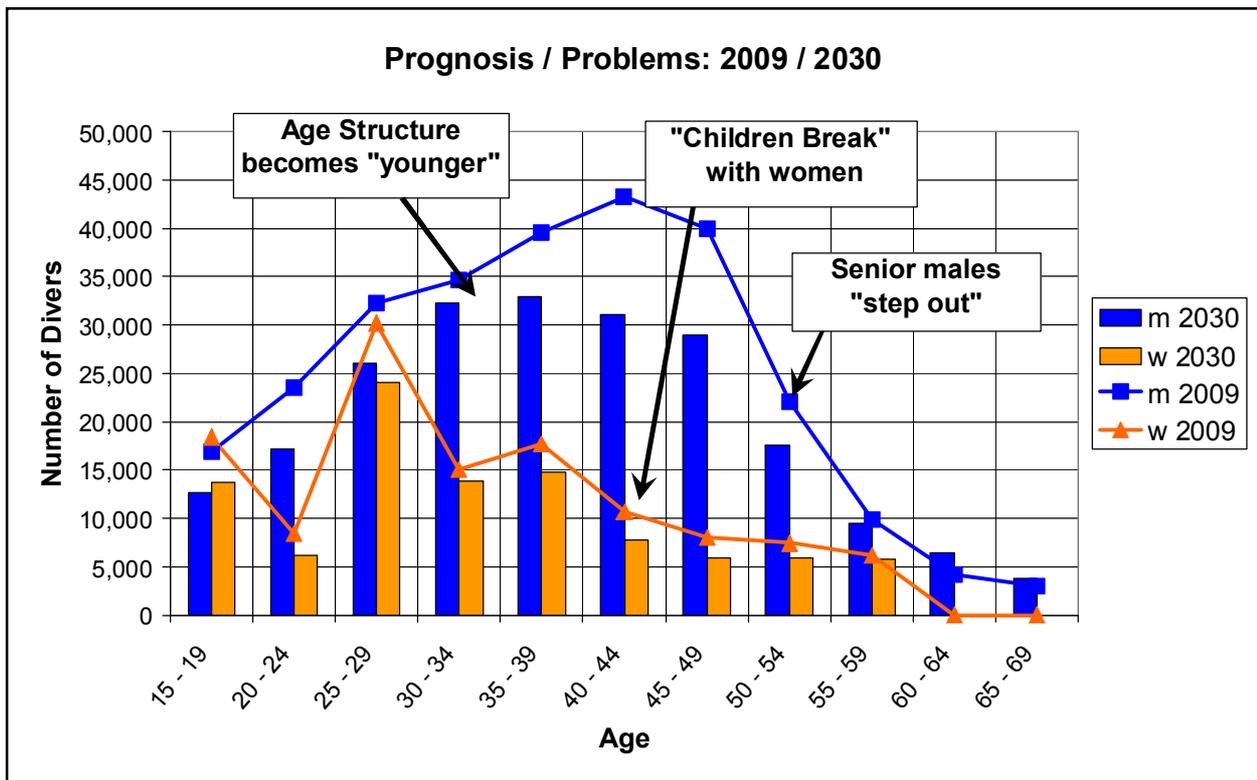

12 Prognosis

Provided that the share of male (m) and female (w) divers of the population (see chapter 4) will not change considerably the foreseeable age distribution can be forecast based on the demographic trend of German census bureau in the years 2020 and 2030.

Scuba Divers + Leisure Divers, age group 15 to 69:

Age group	Year of Prognosis					
	2009		2020		2030	
	m 2009	w 2009	m 2020	w 2020	m 2030	w 2030
15 to 19	16,966	18,428	14,103	15,329	12,653	13,699
20 to 24	23,586	8,390	20,192	7,162	17,243	6,112
25 to 29	32,235	30,229	29,960	27,653	26,085	24,112
30 to 34	34,661	15,005	37,648	16,131	32,251	13,796
35 to 39	39,570	17,749	35,369	16,131	32,904	14,763
40 to 44	43,249	10,690	28,825	7,324	31,068	7,801
45 to 49	39,995	8,017	30,099	6,109	28,916	5,920
50 to 54	22,095	7,433	25,435	8,411	17,517	5,931
55 to 59	9,896	6,156	12,725	7,655	9,442	5,743
60 to 64	4,163	0	5,674	0	6,416	0
65 to 69	2,973	0	2,877	0	3,727	0
Total	269,389	122,098	242,908	111,905	218,222	97,879
Total m + w	391,486		354,812		316,101	

- Substantial structural problems cannot be detected from the collected data e.g. falling interest by younger age groups:
Diving is an established sport.
- Due to the general demographic change (with unchanged interest in diving) the number of (active) divers will decrease by approx. 10% per decade.
- By the decrease of today's strong proportion of „baby boomers“ (40+) the age structure of diving will become “younger” in the future.
- Two age-related trends deserve attention (see data above):
 - Approx. 50% of women at about 30 to 35 years will leave active diving when they give birth to children and they will not continue later.
 - Male leisure divers at 50 years and male scuba divers at 55 years will stop diving within a short time.

13 Hobbies

The interviewees of the survey were also asked for “other hobbies“, up to three free text replies were possible. The named hobbies were collected into groups and count out.

"Proportion %" refers to the sum of all responses (hobby1, hobby 2, hobby 3) of the total of divers.

Men	
Hobby	Proportion %
Sports	47.5%
Boat	10.3%
Computer	7.8%
Car, motor-cycling	6.0%
Mountaineering, hiking	4.0%
Photo, video	3.5%
Traveling	2.3%
Pets	1.5%
Music	1.5%
Reading	1.4%
House & garden	1.4%
Shooting	1.3%
Model making	1.1%
Fishing	1.0%
Total	90.7%

Women	
Hobby	Proportion %
Sports	54.8%
Reading	5.7%
Boat	3.5%
Photo	3.5%
Car, motor-bike	2.8%
Dancing	2.7%
Rescue service	2.5%
Travelling	2.4%
Computer	2.2%
Music	1.9%
Cinema	1.8%
Mountaineering, hiking	1.8%
House & garden	1.3%
Riding	1.0%
Total	88.0%

- Sports was mentioned most frequently.
- For male and female divers there are differences in hobbies:
 Men: sports - boat - computer - car, motor-bike
 Women: sports - reading - boat - photo

Hobby Sports in Detail:

Men	
Hobby Sports	Proportion %
Bike (bicycle etc.)	23.3%
